A little Stone a lot of Distinction

Natural stone gives a home such an air of distinction—yet you don't have to use much stone—you just have to use it effectively. A stone veneer framing for your front door—a stone planter under your windows—one facade of stone (when the rest of your exterior is clapboard) these are economical and charming ways of adding the elegance of stone to your home.

You'll find natural stone a most handsome and practical flooring for such traffic areas in the home as halls, foyers and activities rooms.

And of course, with stone, you can have the most formal fireplace in one room, and a delightfully informal one in another. You can use it for an entire fireplace wall, or as a room divider, or for a wall area that might otherwise be uninteresting in appearance.

Decorators as well as architects approve the use of stone in interiors. They've found that they can match the color of stone in fabrics. They've discovered that the texture of stone adds a new contrast that is purely inspirational. As one leading decorator put it: "There's nothing so uninteresting as four plaster walls. Make one of those walls stone, and the room is immediately inviting, even before we begin to work."

Because of the great revival of interest in this building material and to show you some of the colors and textures available in quarried stone, we've devoted four pages in the center of this book to the most honest reproduction of stone that the ink of a printer can produce. We would like to suggest that you visit your local stone quarryman or contractor and see the originals of these stones before you complete your construction plans.

FOREWORD

HOME DESIGN TODAY

The days of grotesque exterior design, characterized by ornateness and poor balance, are passing. Today's architect and designer strives to incorporate simplicity and good proportion. The result is an exterior that is both pleasing and restful to the eye.

Of no less importance is the interior. The floor plan of the home should provide the best traffic circulation possible with the size home being planned; it should afford a maximum amount of privacy; it should reflect the needs of the family; and above all, it should be an efficient place in which the housewife works. These are the bare requisites the architect and designer must keep in mind.

While striving to attain these points he must consider construction costs. To design an ideal home while disregarding economy of construction is to put that home out of reach of most pocket-books. Standard construction procedure must be adhered to. Accepted and proven materials must be specified. However, an eye must be given to incorporating the more practical advancements whenever possible.

We at Home Planners, Inc., feel that designer Richard B. Pollman and architects Palmquist & Wright have, in the following pages, exhibited great insight in creating their latest series of designs.

SELECTING THE RIGHT HOME

The aim of this book is to launch you into many pleasurable hours of home planning and building.

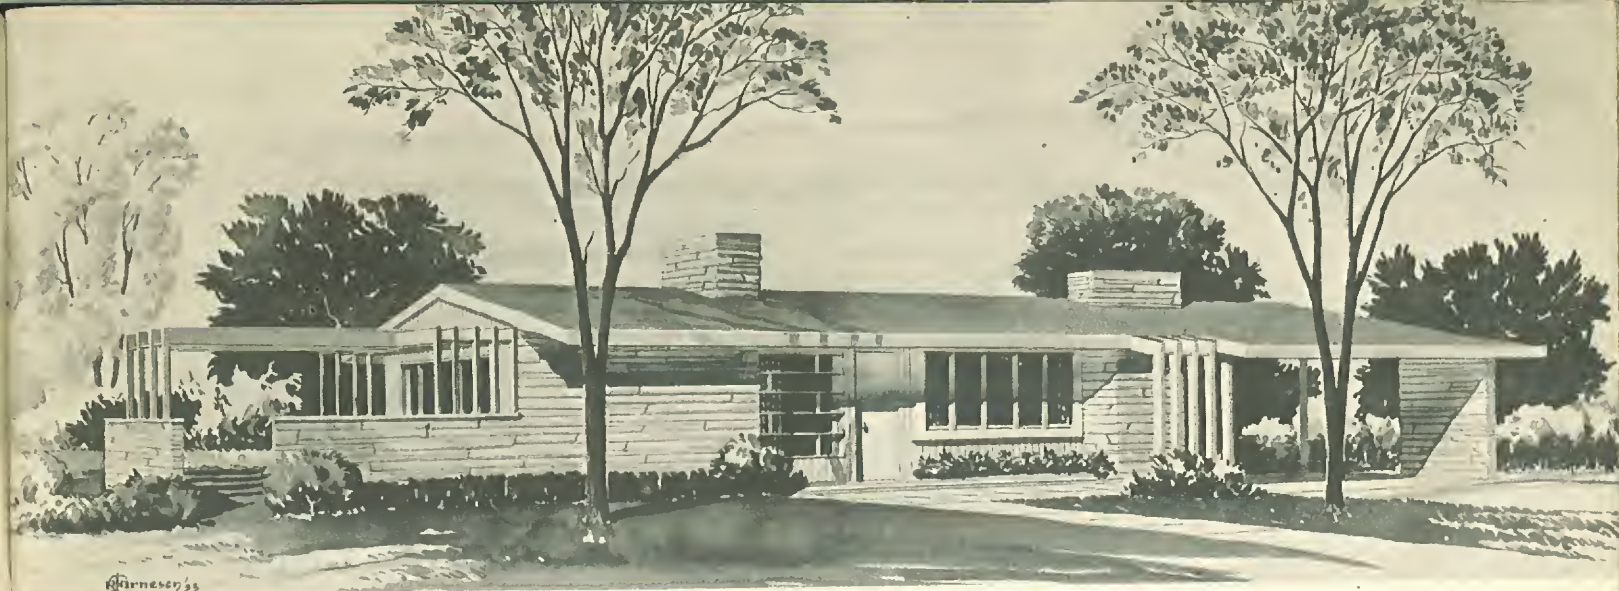

In an effort to guide your thinking we urge you, when looking over these designs, to consider not so much your desires as your family needs. There are certain functions of home life that are well established—eating, sleeping, working and relaxing being the most common. Each of these functions has many variables, depending upon your modes of private and social living. It is the consideration of all the requirements of the family, and the provision for them in a comfortable and convenient manner, that will make the selecting of your home the right one.

Consider your needs in relation to: the freedom of open planning, the traffic circulation, the practicability of dual use space, and the possibility of future expansion. Do you need a basement; is one feasible in your area? Do you need a dining room; is a dinning-L sufficient? Consider your present bathroom. Should you have a larger one or should you have a separate wash room?

Neither can you overlook cost of home construction if you are to stay within your budget. To arrive at an approximation of cost, we suggest you obtain the cost of construction per square foot in your area and multiply it by the square footage we have shown for each design. Accurate costs can be obtained by consulting with your local builder, material dealer or architect, with blueprints and material lists of the home you have selected.

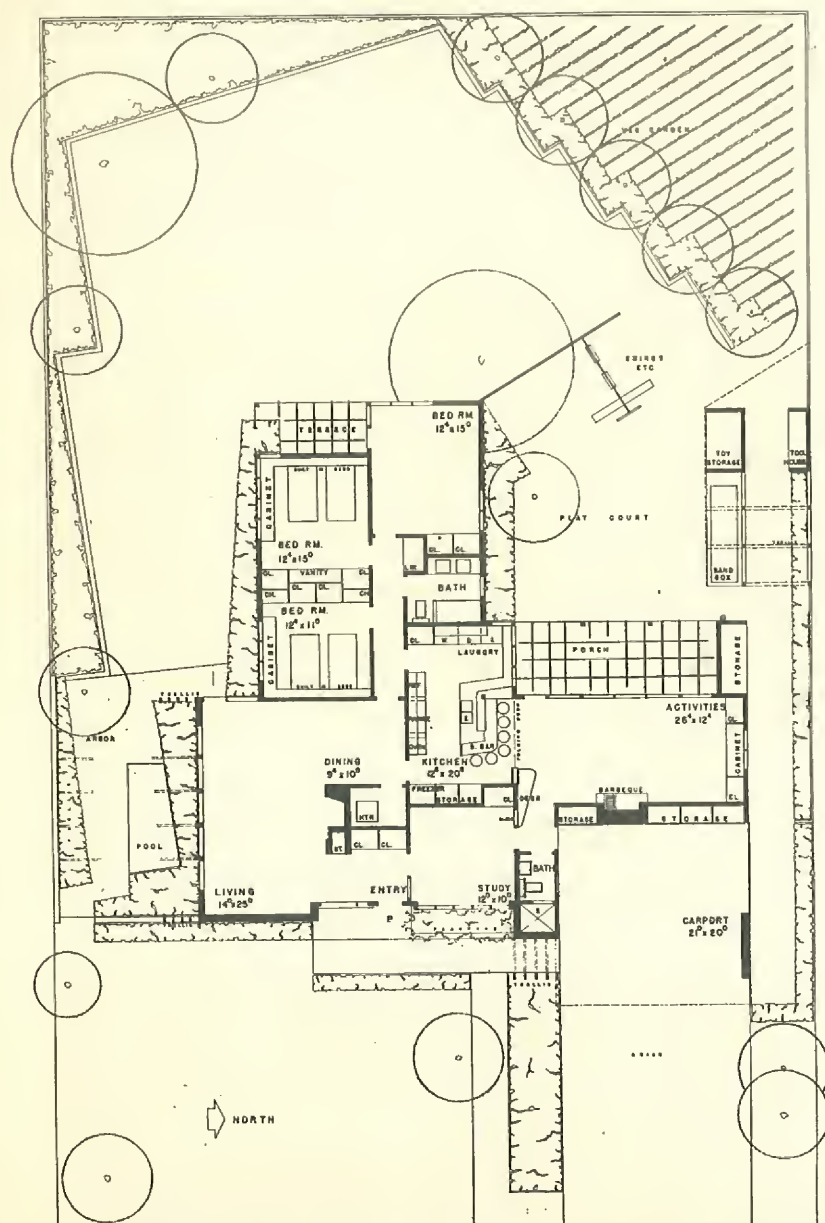

If we in this book have set before you for the first time, in definite form, some of the ideas you have had difficulty visualizing; or if we have brought to you even a few new ideas you have never before visualized, we have been a success. But our greatest success will come from your having found here a home that meets your needs and those of your family.

Editor

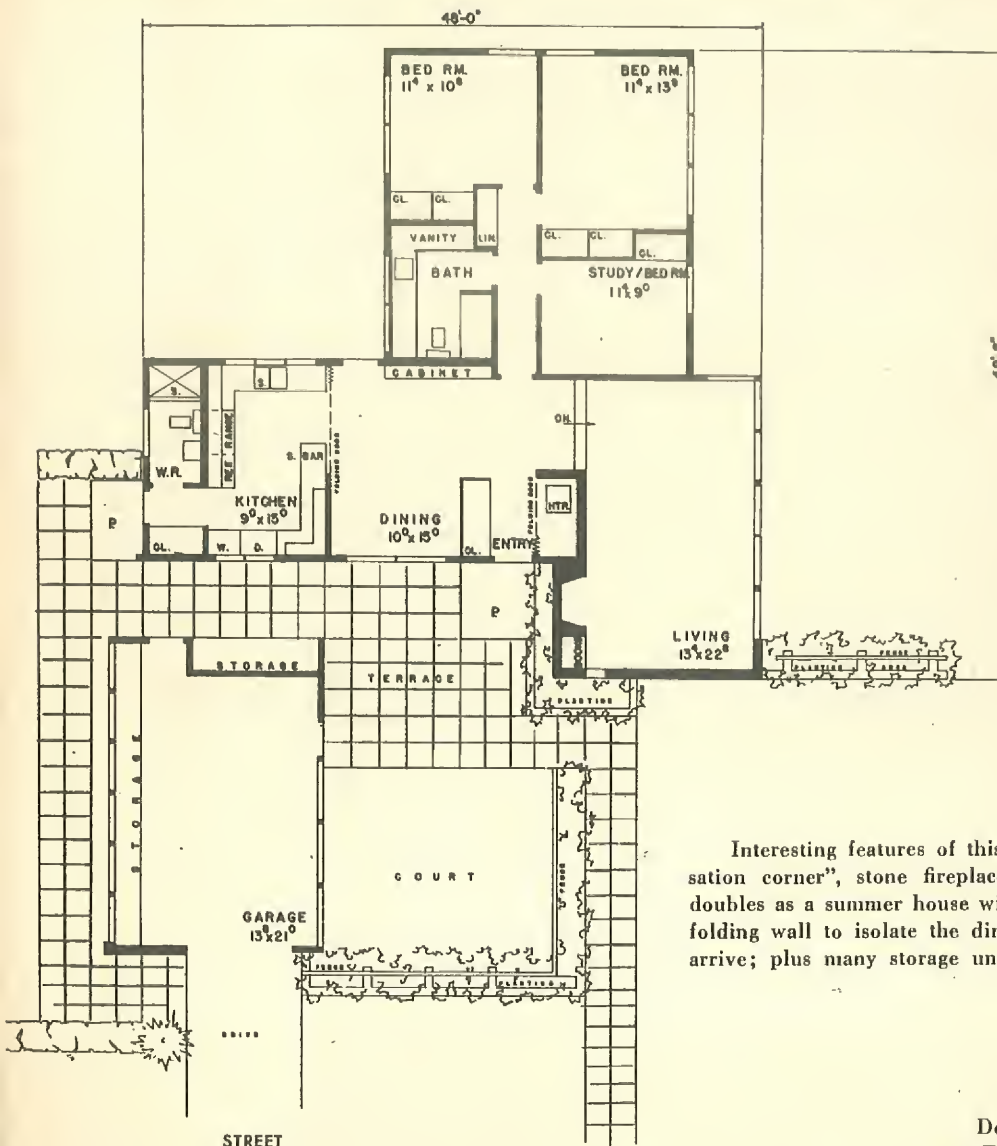

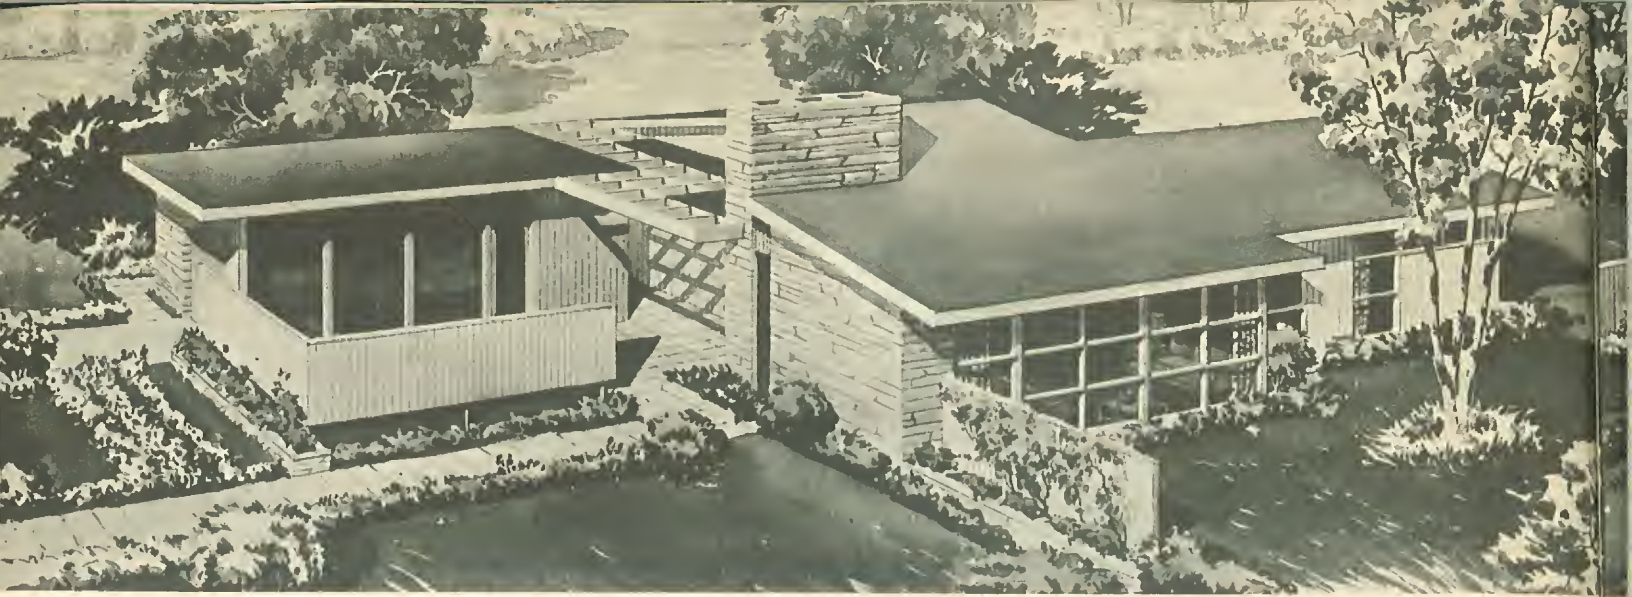

DESIGN D 382

2,274 Sq. Ft.
21,000 Cu. Ft.

A good example of convenience and livability is found in this contemporary design. It has nice proportion both inside and outside. Notice the relationship of room placement and ground areas. Consider these outstanding points:

- Large rooms.
- Lots of light.
- Freedom of open planning in activities—kitchen and living-dining areas.
- Folding door permits closing off kitchen from activities room.
- Abundance of built-in features.
- Extensive storage space.
- Lavatory adjacent to activities room and study.
- Efficient placement of interior and exterior doorways (did you see the terrace off the master bedroom?).
- Traffic circulation which permits quick and independent passage to any part of house or grounds.
- Close proximity of all family activities by clever alignment of carport, activity room, play court and garden areas on one side of the lot.
- Beautiful exterior enhanced by low roof lines and effective use of quarried stone.

Here is proof that the small lot need not be a problem. The two contemporary homes shown on pages 4 and 5 offer good living to the city dweller who loves freedom and convenience. Both houses are ideal for a West-facing lot, allowing the large living area windows to face the South. Low, wide roofs and panel windows provide a free-living atmosphere. The vertical-horizontal contrast of board and quarried stone give solidity. Privacy is achieved with interestingly designed fences.

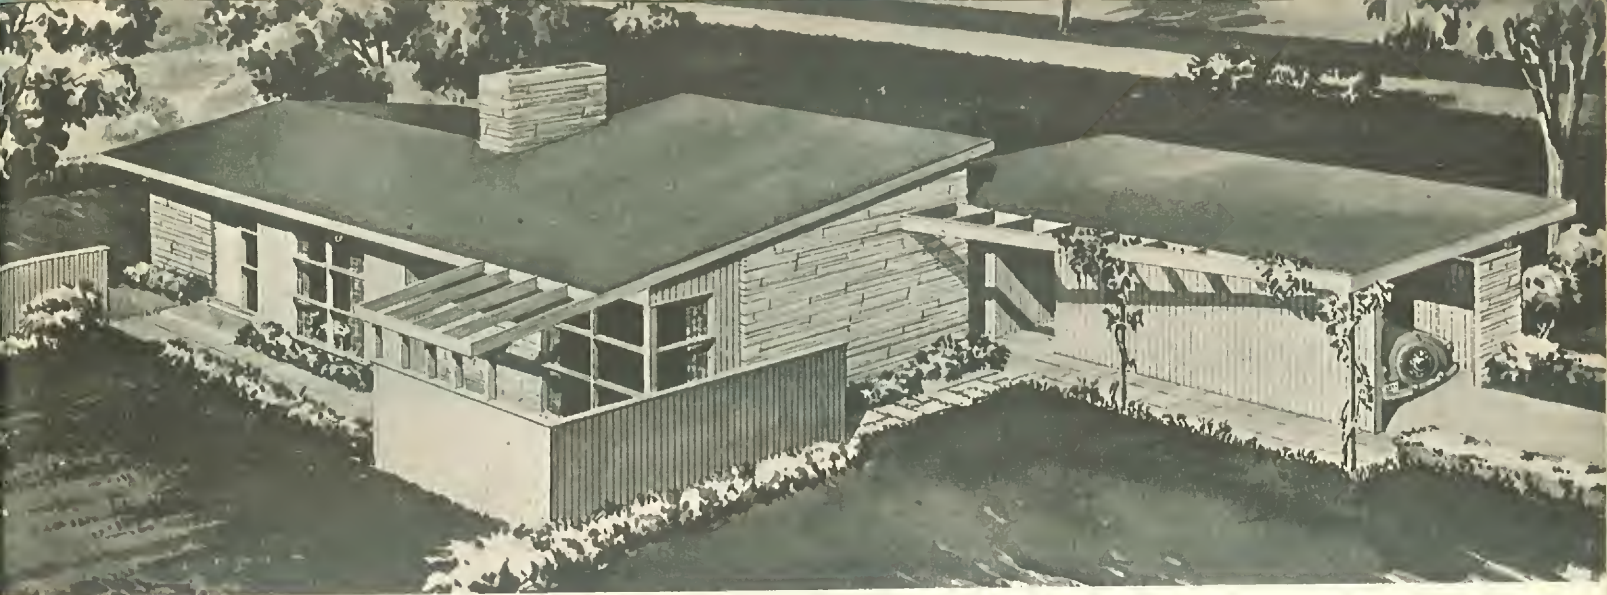

Convenient Living

DESIGN D 386

1,495 Sq. Ft.
14,584 Cu. Ft.
Excluding Garage

Interesting features of this beautiful home include a "conversation corner", stone fireplace with bookshelves, a garage that doubles as a summer house with an enclosed court and terrace; a folding wall to isolate the dining area when formal dinner guests arrive; plus many storage units and built-ins.

Design #384 on page 5 is ideal for a corner lot too. The view at right shows how the "long side" of the house looks in case you decide to have it face the street. The corrugated plastic fence is an interesting feature. One of lesser height could extend in front of windows if this side of house faced the street.

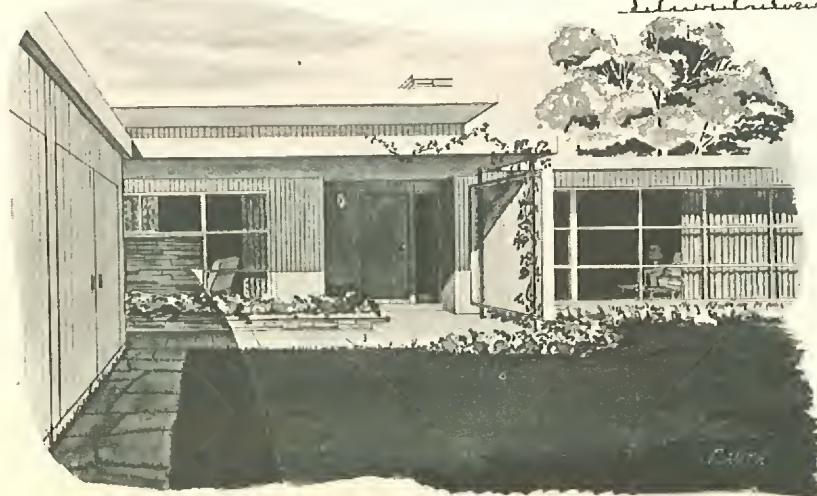

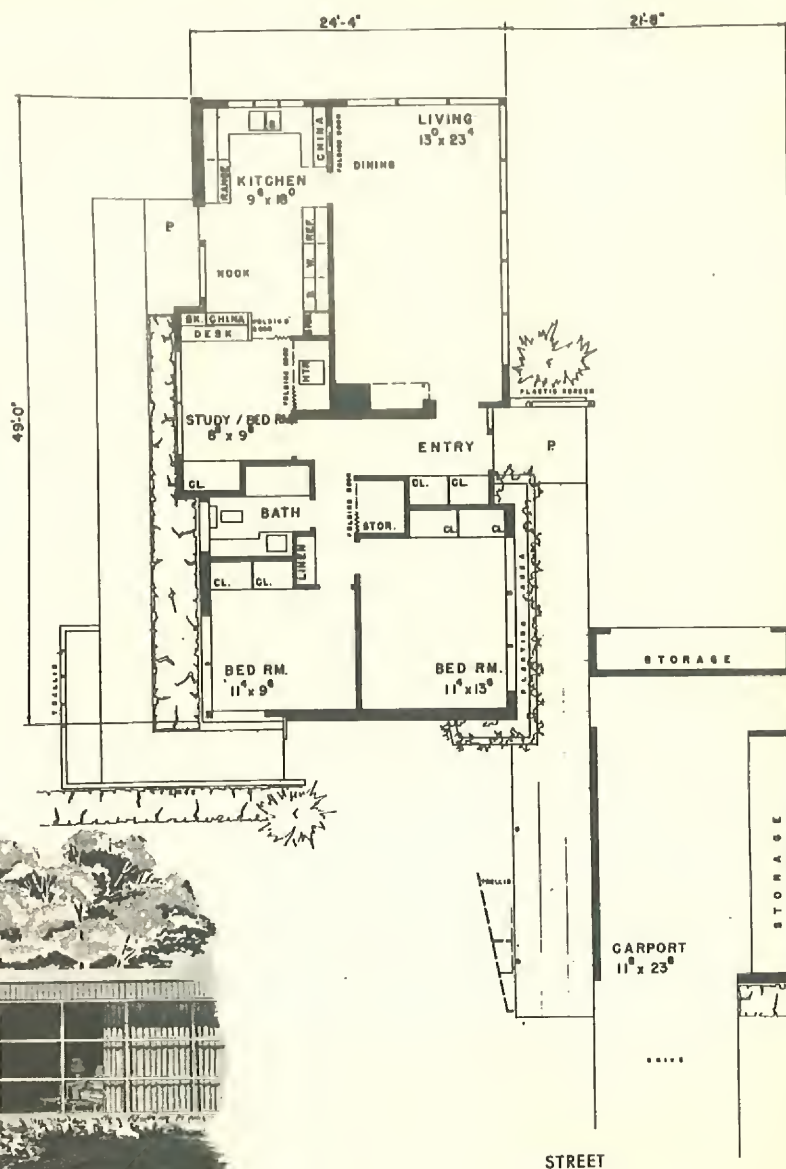

Convenient Living

DESIGN D 384

1,239 Sq. Ft.
11,947 Cu. Ft.

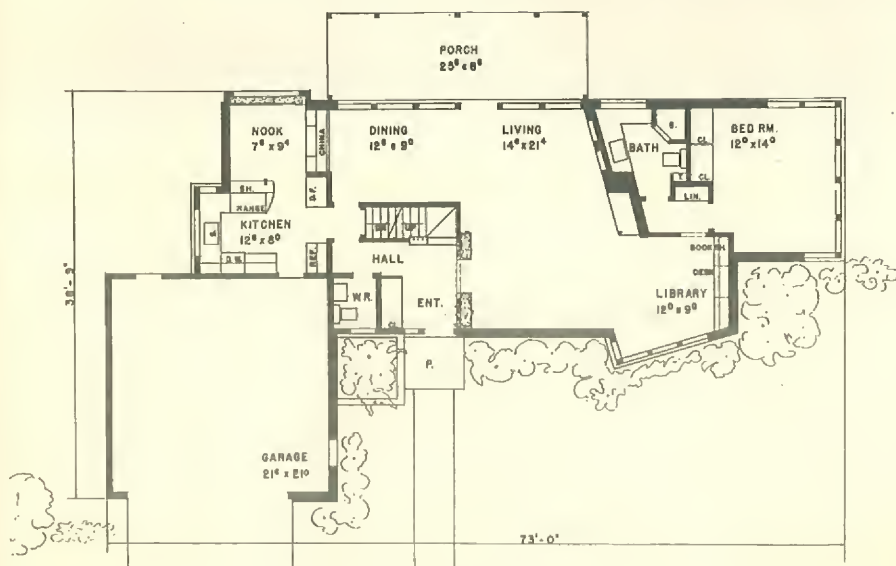

Notice the study-bedroom, positioned for privacy yet available for added nook space by means of a folding door. It could serve as a guest room or as the homemaker's "office". Windows on two sides of the dining area makes the outdoors and inside seem as one. The two open sides of the fireplace stimulate both the appearance and the feeling of warmth.

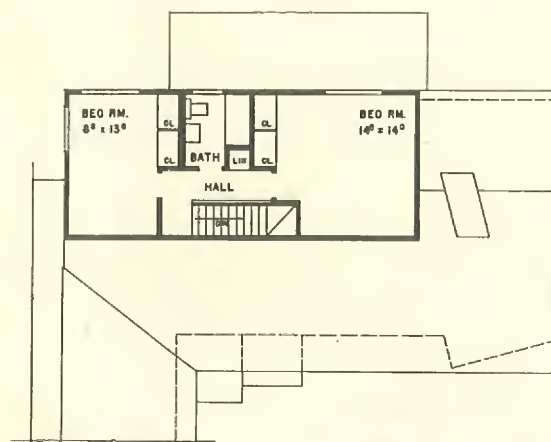

Convenient Living

DESIGN D 243

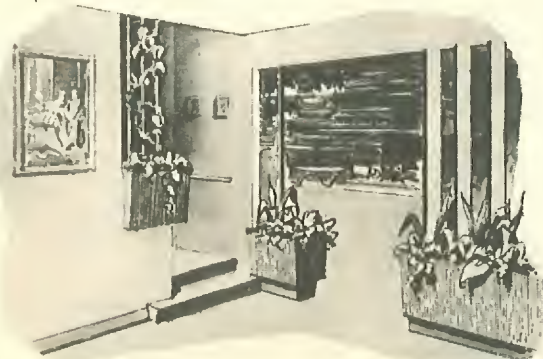

1,317 Sq. Ft. (1st fl.)
525 Sq. Ft. (2nd fl.)
30,712 Cu. Ft.
Excluding Garage

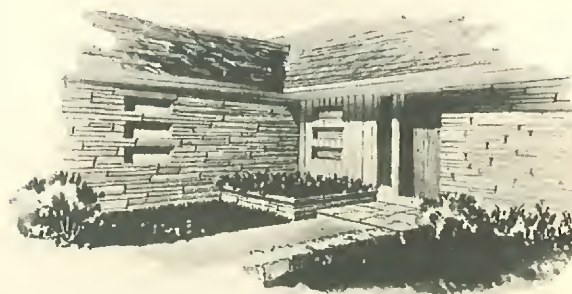

This spacious home is equally attractive in a group or by itself. You will be happily at home inside or outside here with the large porch adding to your comfort and convenience. Again notice what can be accomplished with quarried stone and well-placed windows. There are two bedrooms and bath upstairs and one bedroom with bath on the main floor. The angular walls offer unlimited possibilities for interior decorating and furnishing. Don't overlook the large nook and the many built-ins.

This open-end fireplace serves both the living and library areas; a good example of open-planning.

The stone fireplace catches your eye as you walk into this roomy and cheerful front entrance.

Close-up of front porch. The stone planting area perfectly blends house and grounds.

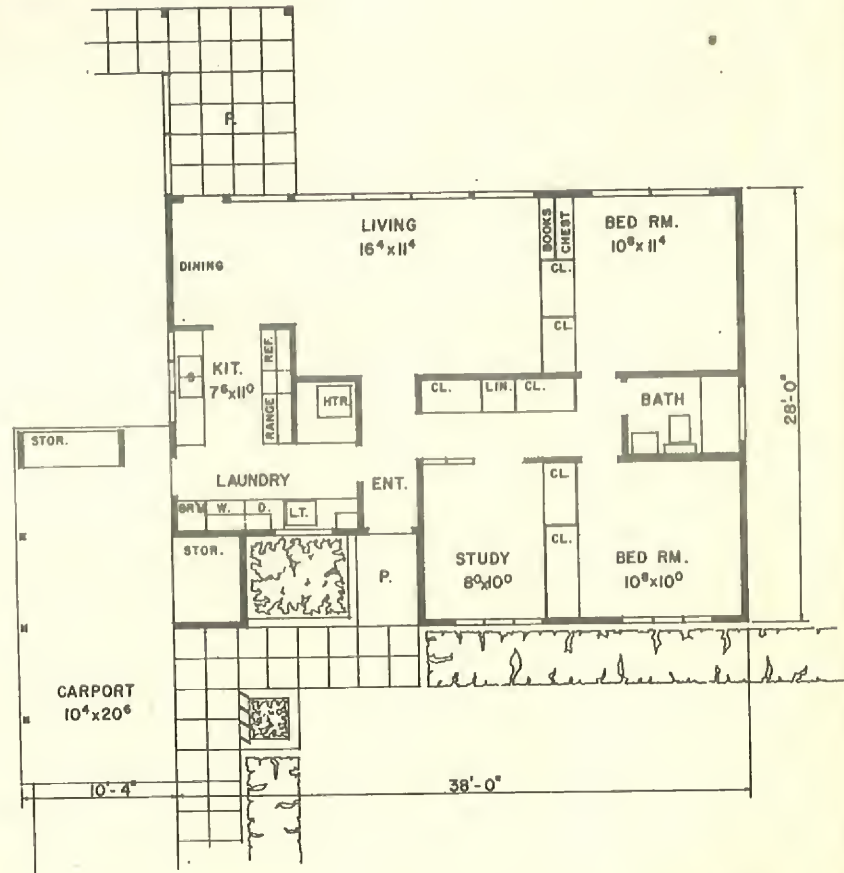

Convenient Living

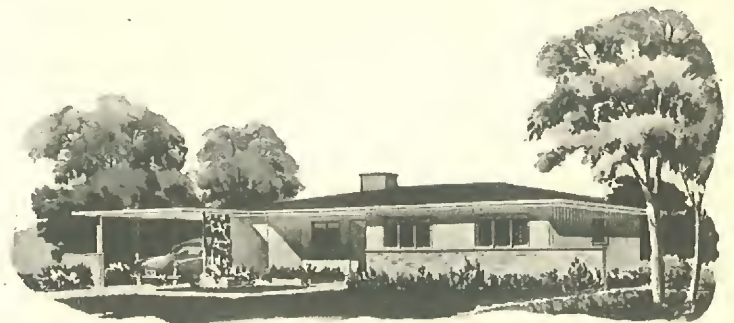

DESIGN D 314

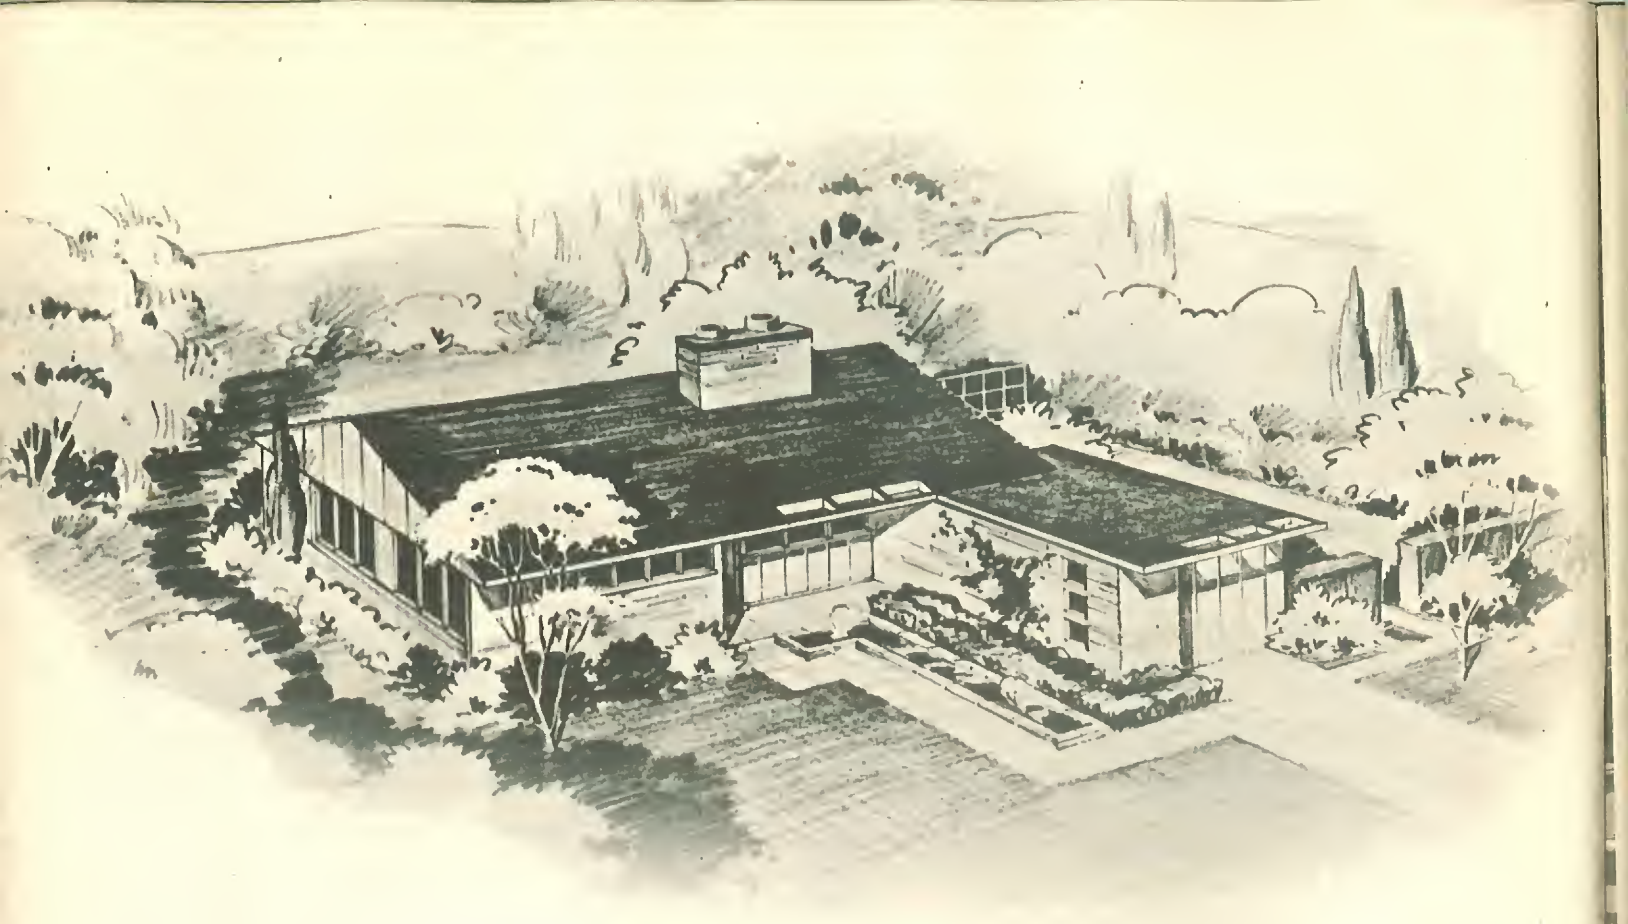

971 Sq. Ft.
9,311 Cu. Ft.

Here is a lot of home for those desiring compact and efficient room arrangement. The entrance centralizes traffic and allows movement in any direction. The bedroom area is completely isolated to assure privacy. The extensive well-positioned closets insulate against sound. Stone planting area in front, and covered porch off the dining room are but two of the many aides to *Convenient Living* in this home.

The available blueprints for this home include details for building all four of the exteriors shown here. A good example of how quarried stone can enhance the appearance is shown in the elevation at the top of the page. All exteriors have at least a stone planter.

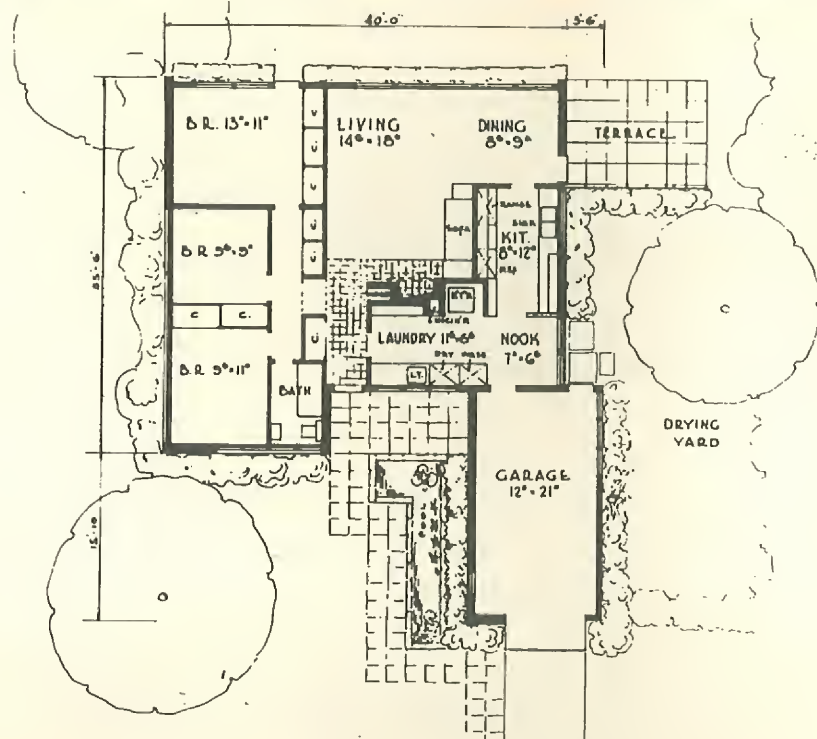

Emphasis has been placed on modern detail combined with a low-pitched, overhanging main roof in this design. The exterior walls of colorful quarried stone and plywood panels blend into the landscaping and become a natural part of the setting. The large living-dining area has been arranged for functional furniture groupings. Note the convenience of the combined kitchen-nook-laundry area.

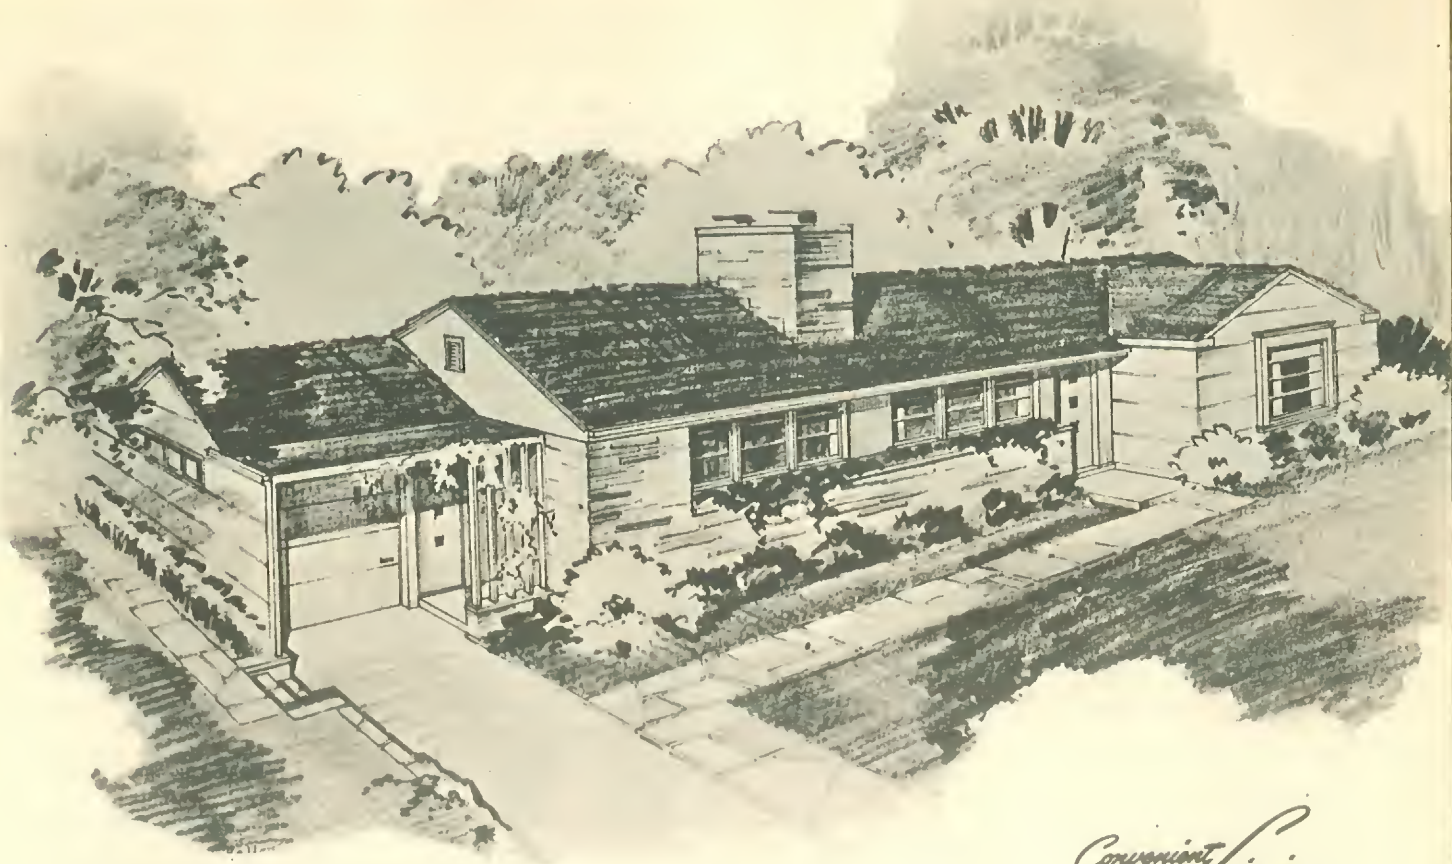

Convenient Living

DESIGN D 6

1,160 Sq. Ft.
12,830 Cu. Ft.
Excluding Garage

A limited supply of full color $\frac{1}{4}$ " scale models are available for designs No. 3 and No. 6 **ONLY**. These are die-cut and ready for assembly so that you can better visualize your next home before you build. Scale furniture is included. See page 52 and order card on inside back cover.

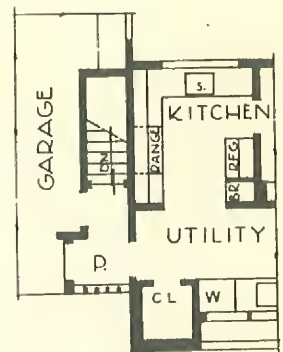

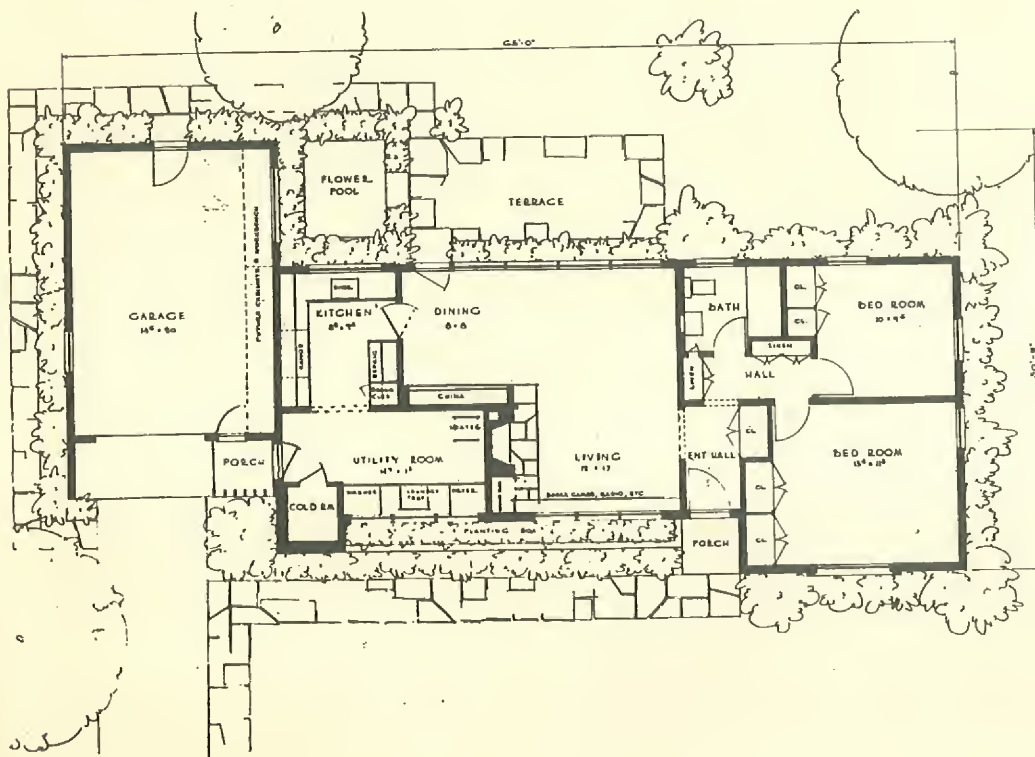

The exterior of this home has been designed with simplicity. The long stone faced flower box and low roof lines accent the horizontal feeling. A beautiful fireplace, built-in cabinets, book shelves and china buffet are features of the L-shaped living-dining area. The compact kitchen and a laundry arrangement provides fine floor area for children's activities. The cold room could be an extra lavatory if desired.

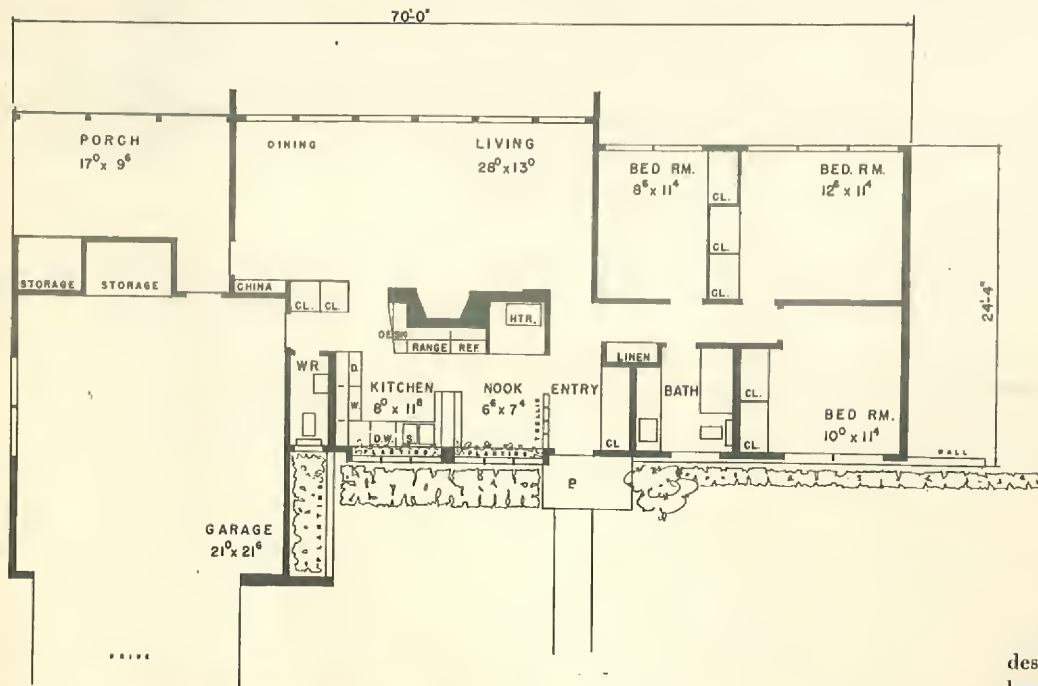

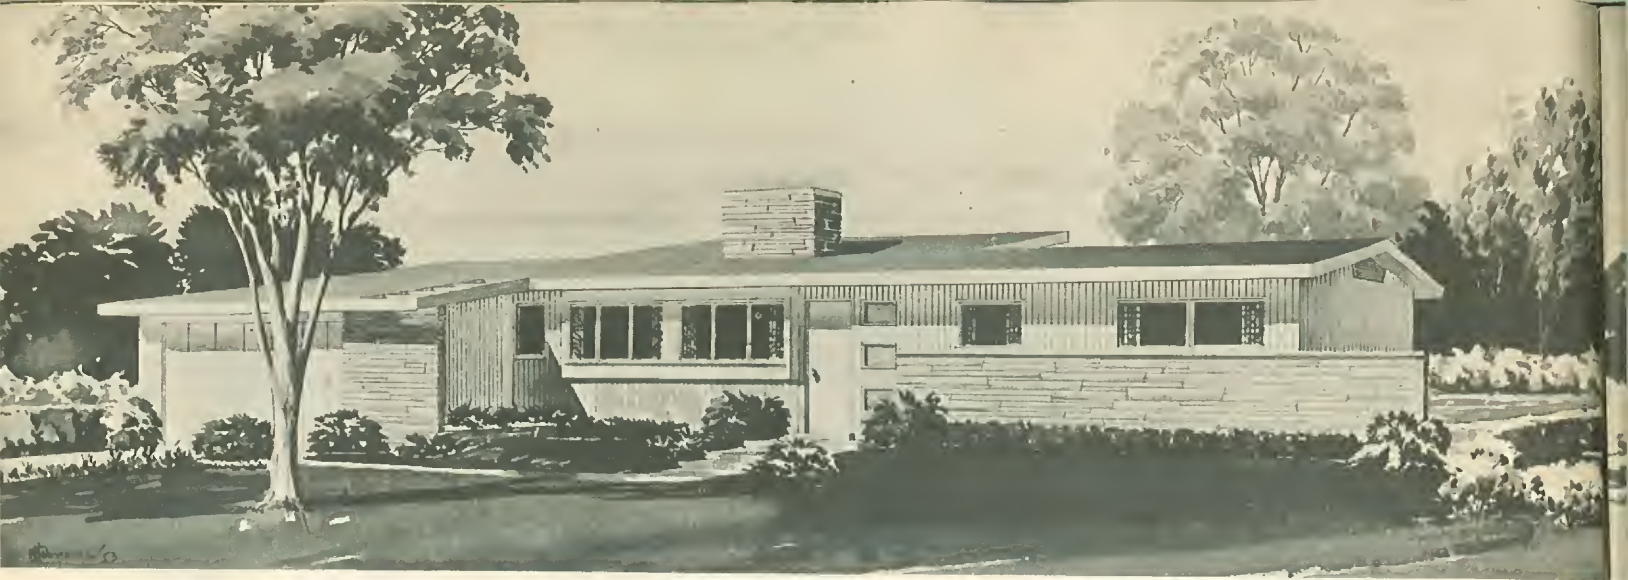

Convenient Living

DESIGN D 3

970 Sq. Ft. (House only)
10,670 Cu. Ft.
(Without basement)
14,880 Cu. Ft.
(With basement)

Location of stairway
if built with basement.
Available blueprints
and material lists in-
clude optional base-
ment.

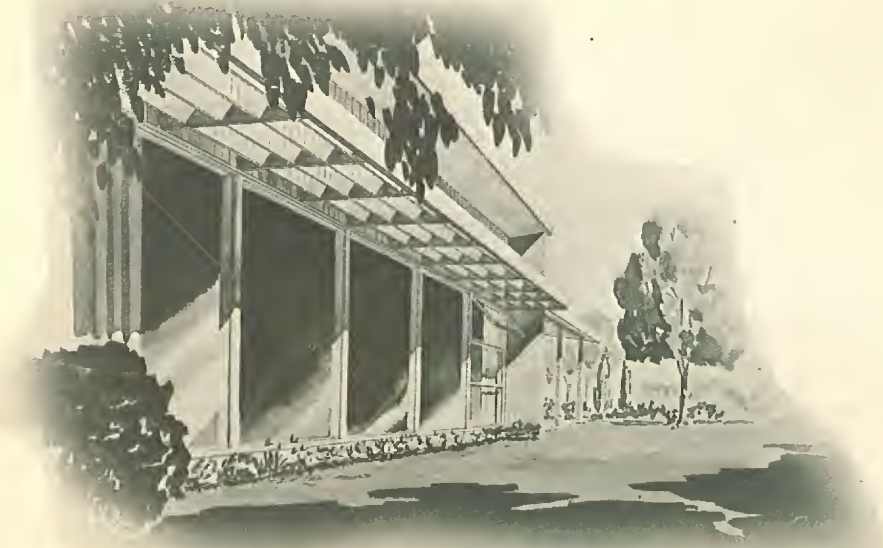

Convenient Living

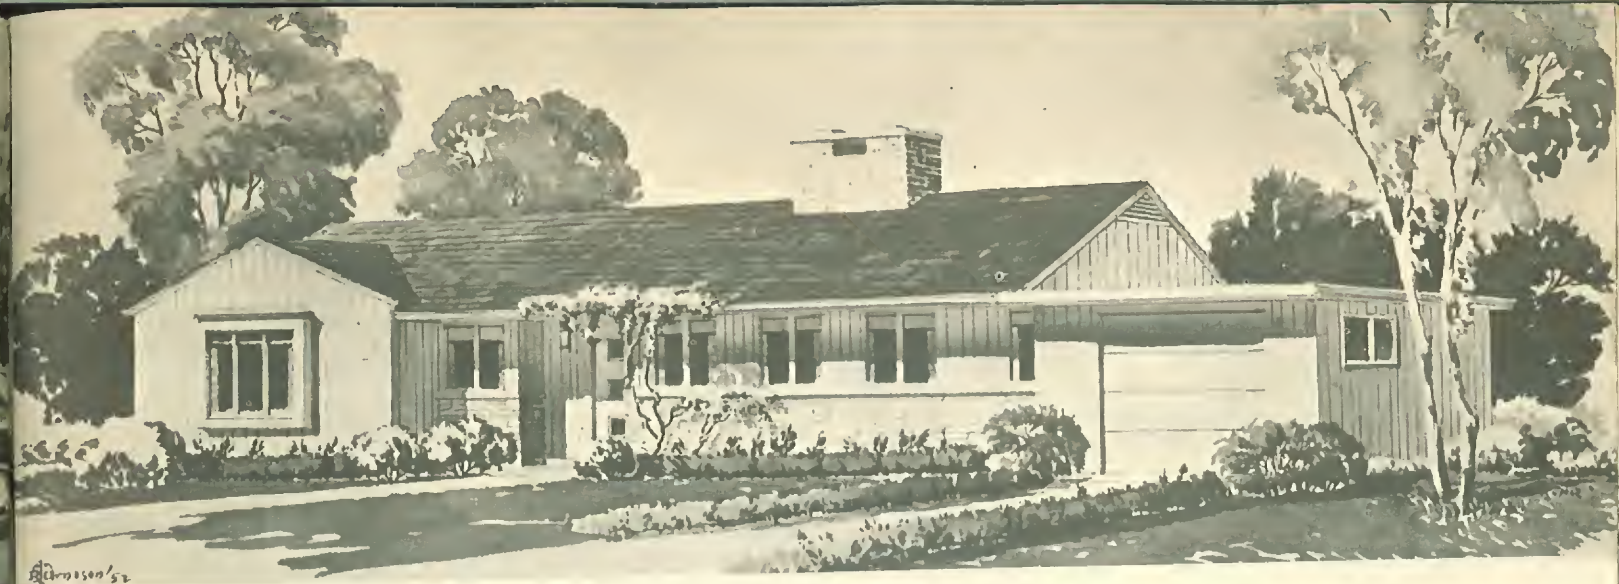

DESIGN D 383

1,300 Sq. Ft.
12,232 Cu. Ft.

Observe the efficiency of layout in this design for *Convenient Living*. Brightness and beauty are given by the large windows which comprise the entire outside wall of the living-dining room. The functional island with fire-place unifies this area with the practical kitchen-nook. No traffic jams here! The centered entry facilitates four-way passage. Three bedrooms and all that closet space are a pleasant surprise. The wide stone chimney and extended lower front wall of stone add exterior dignity.

The living-dining windows admit the warmth of the low winter sun, yet they are shielded from the high summer sun with this interesting trellis.

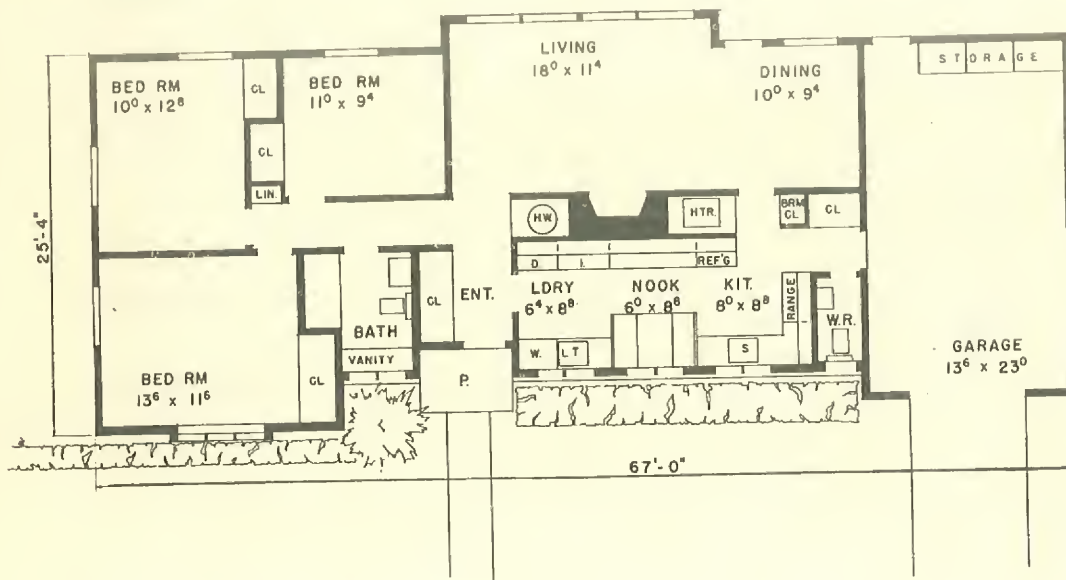

Simplicity lends distinction to this clean-cut three-bedroom home planned for efficient living. Notice the pleasing contrast of vertical v-groove boards and the long horizontal line of the window shading roof overhang, which joins the flat-roofed garage. Good traffic circulation is effected by the functional "island" which also contains the fireplace.

Convenient Living

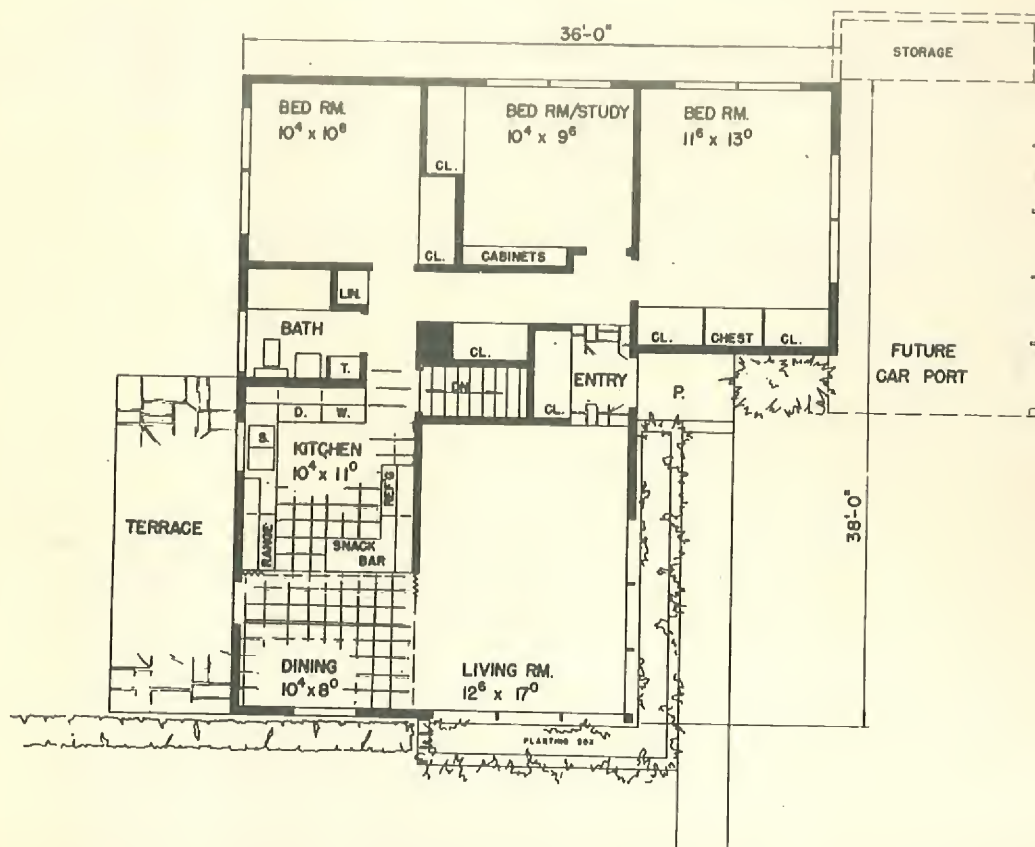

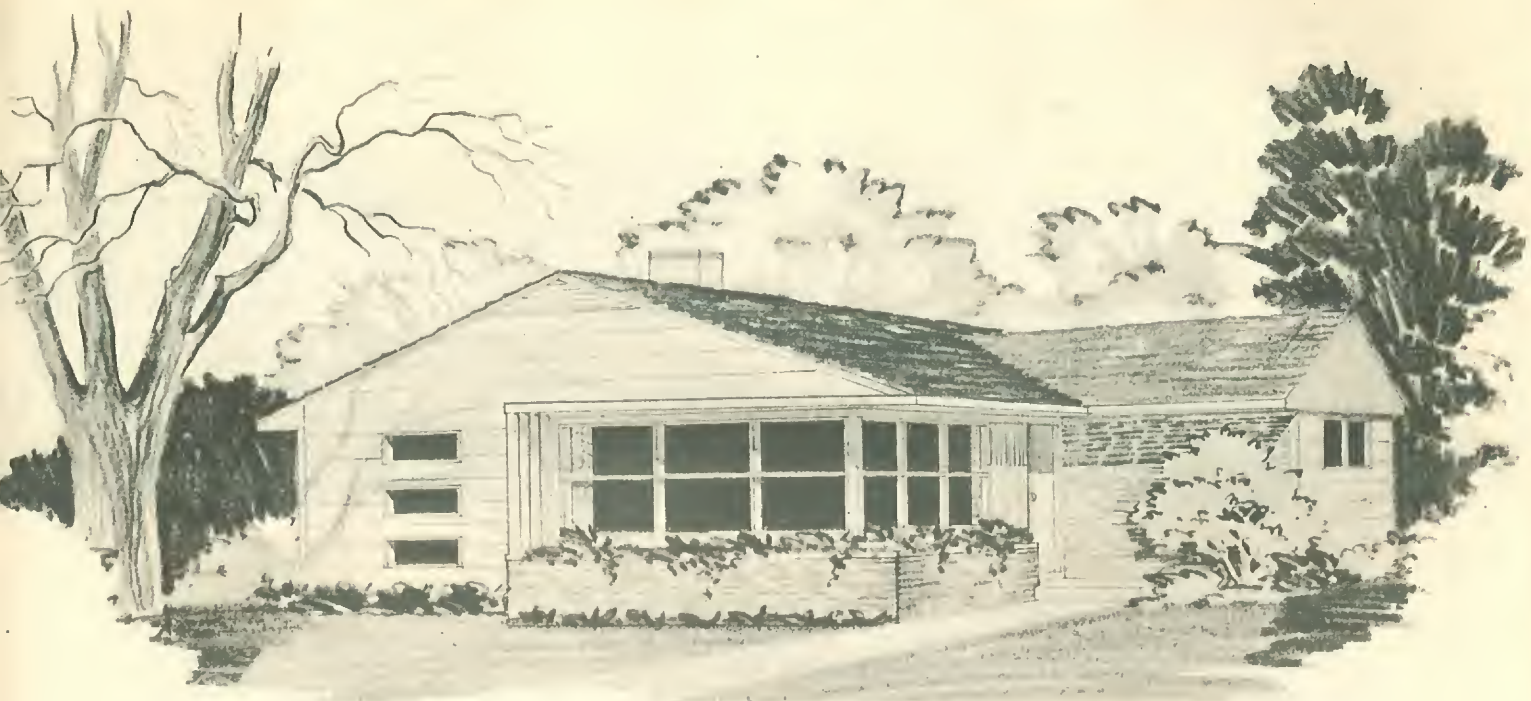

DESIGN D 30

1,266 Sq. Ft.
14,110 Cu. Ft.

The minimum of framing in the living-dining room panel window assures plenty of light inside and harmonious blending with structural lines outside.

Convenient Living

DESIGN D 318

1,107 Sq. Ft.
19,479 Cu. Ft.

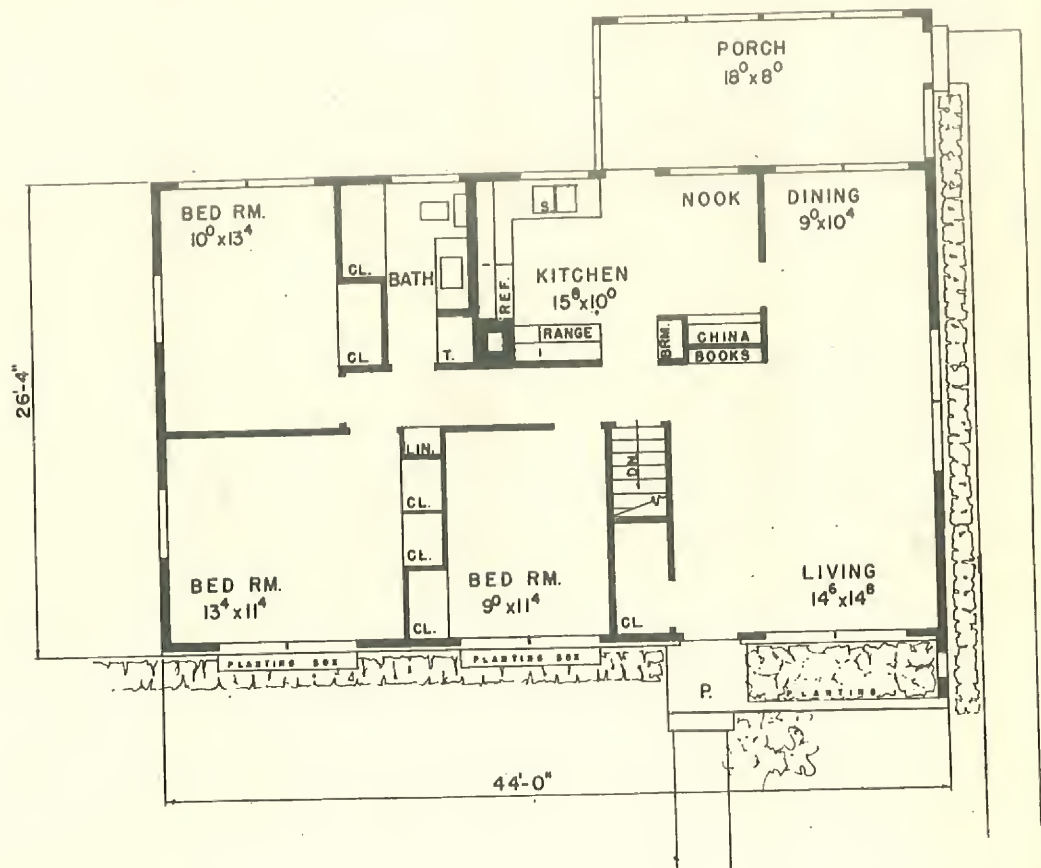

The expanse of windows above the natural stone planting box is the focal point of this exterior. Quarried stone also adds freshness around the entrance. With the dining room directly connected to the kitchen the two rooms may be opened into one large area of casual atmosphere. A center hall entry provides ready access to all rooms.

Convenient Living

DESIGN D 357

1,144 Sq. Ft.
21,564 Cu. Ft.

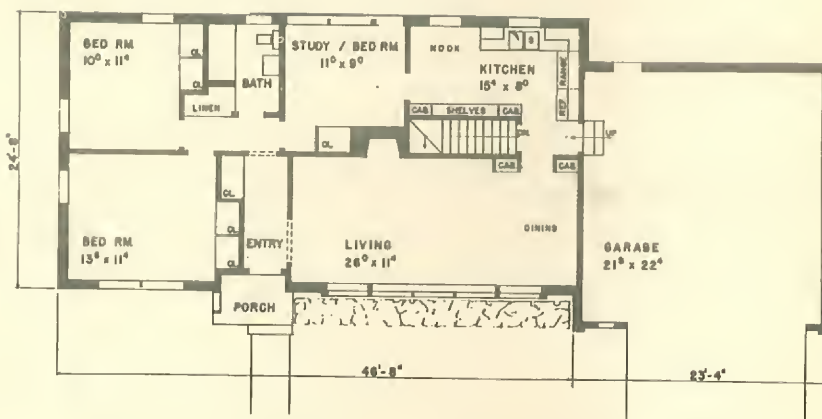

Always eye-catching is this complementing combination of horizontal bevel lap boards and vertical v-groove boards neatly set off by quarried stone lower front. The room-height thermo-pane window counterbalances the high-sill front bedroom windows, and solidity is enhanced by the smooth, unbroken door surface. The interior features nicely proportioned rooms, large U-shaped kitchen-nook and a perfectly-located basement stairway that does not intrude upon room space. How do you like the spacious porch?

DESIGN D 53

1,178 Sq. Ft.
20,978 Cu. Ft.
Excluding Garage

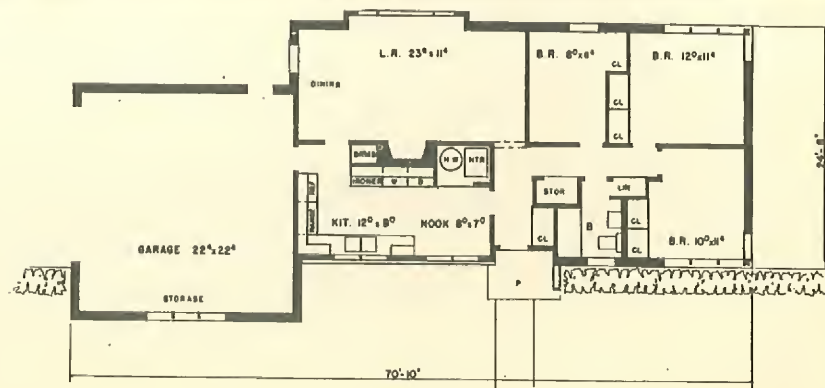

Imagine the luxury of a twenty-six foot living-dining area with an eighteen foot panel window! The hip roof with a three foot overhang and natural stone as a surround for the large windowed area preserve that smart, dressed-up appearance.

DESIGN D 51

1,185 Sq. Ft.
13,527 Cu. Ft.

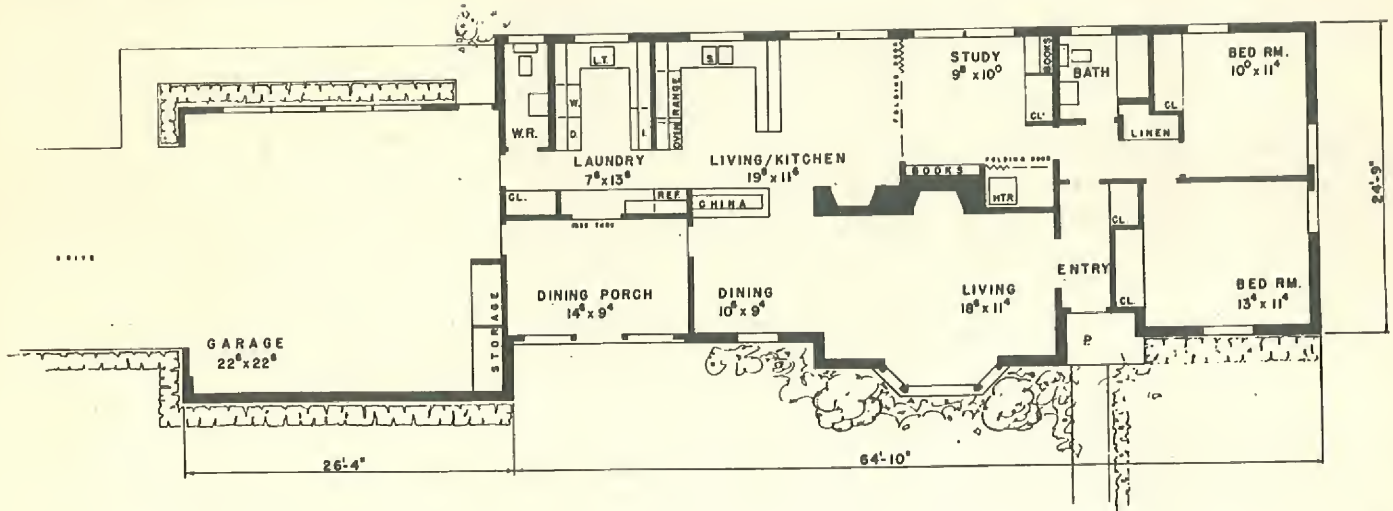

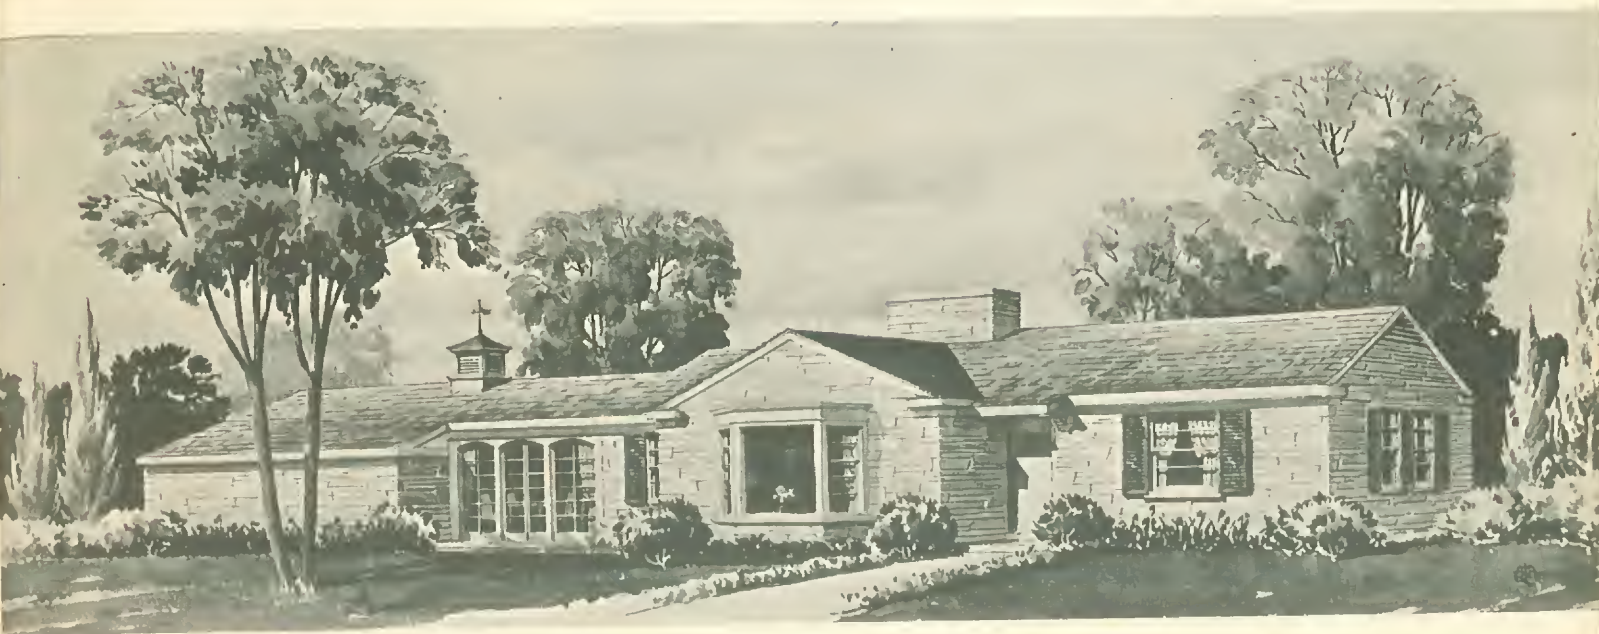

Study the efficiency of layout: a kitchen that sacrifices nothing in providing ample eating space and room for the washer, dryer and ironer; a pleasant living room with dining at one end; windows and doors in the three bedrooms are placed to provide maximum use of wall space for good furniture arrangement. Notice how the stone and V-cut boards provide relief for the brick veneer.

Convenient Living

DESIGN D 373

1,679 Sq. Ft.
19,027 Cu. Ft.
Excluding Garage

Richard B. Pollman has preserved beauty in width here, emphasizing it with low roof lines and eliminating monotony with large, well spaced glass areas. Large rooms throughout, two fireplaces, charming dining porch and the utilitarian arrangement of the living-kitchen area and study with folding doors make this truly a *Convenient Living* home. Its versatility will please the most discriminating.

Quarried stone — beauty with simplicity and durability!

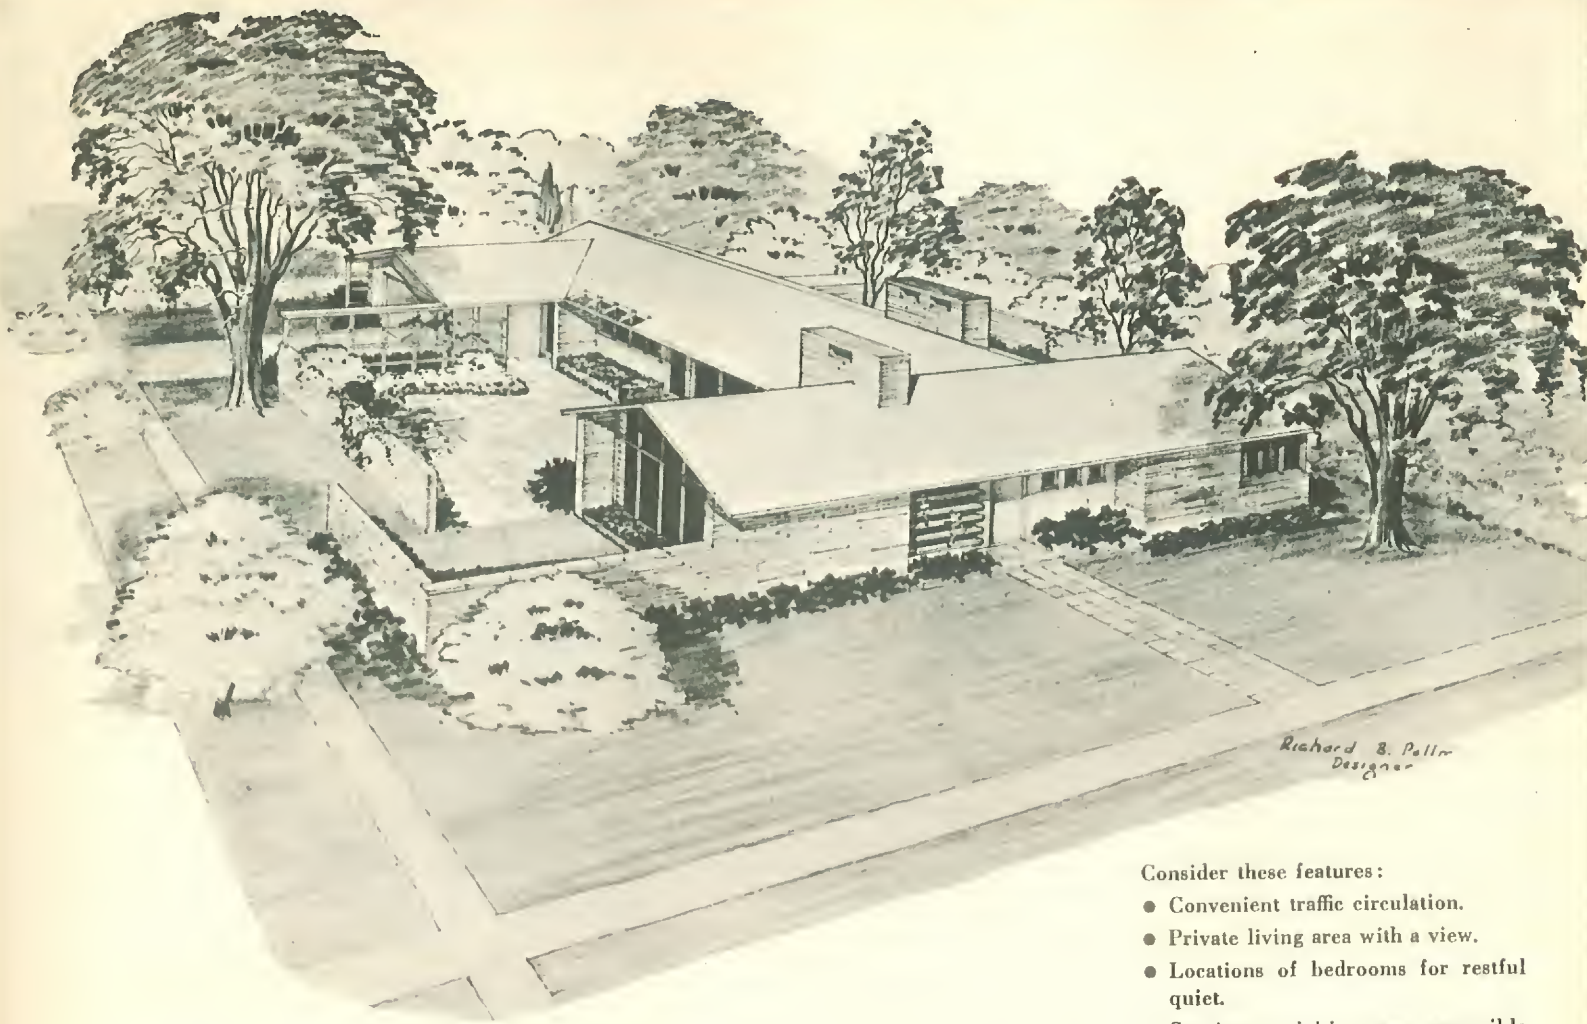

Quarried stone — a wall with a view, one your neighbor would not mind looking at.

Quarried stone — a pleasant back-drop for casual surroundings.

Quarried stone — warmth for the interior.

The natural stone exterior of this home presents a freshness that will never lose its appeal. This design is truly a show place for a corner lot.

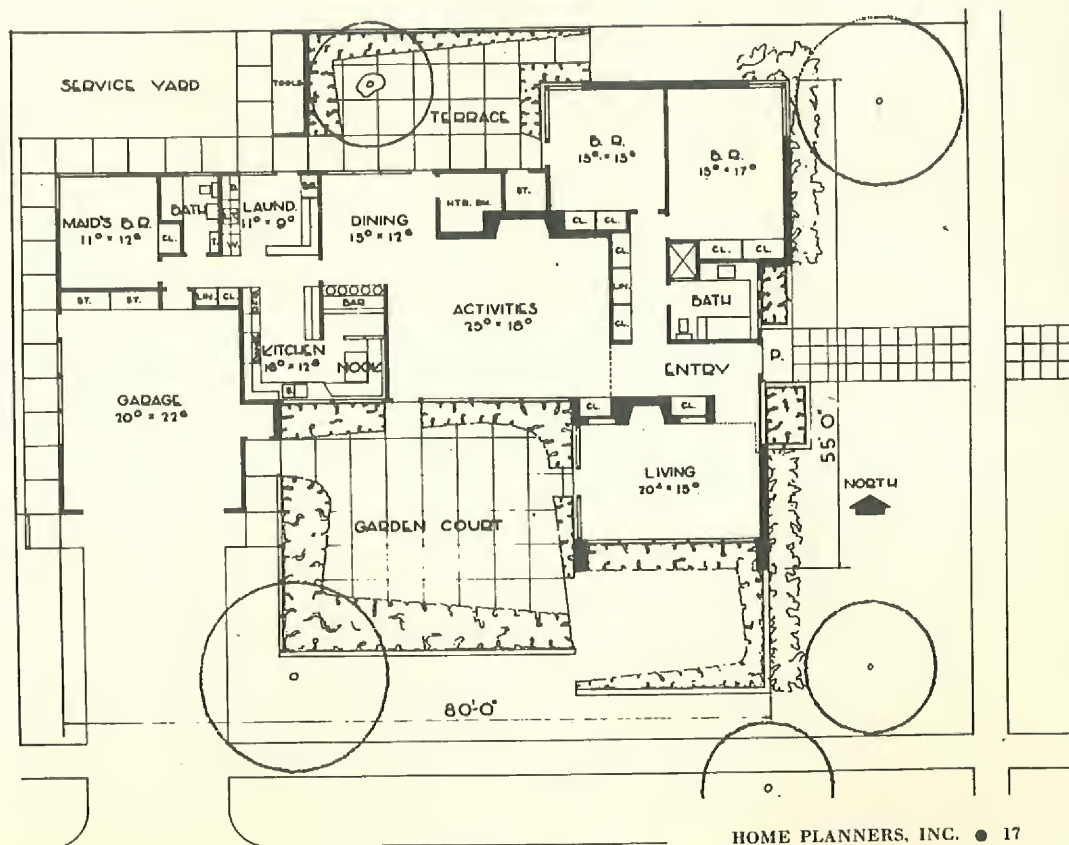

Consider these features:

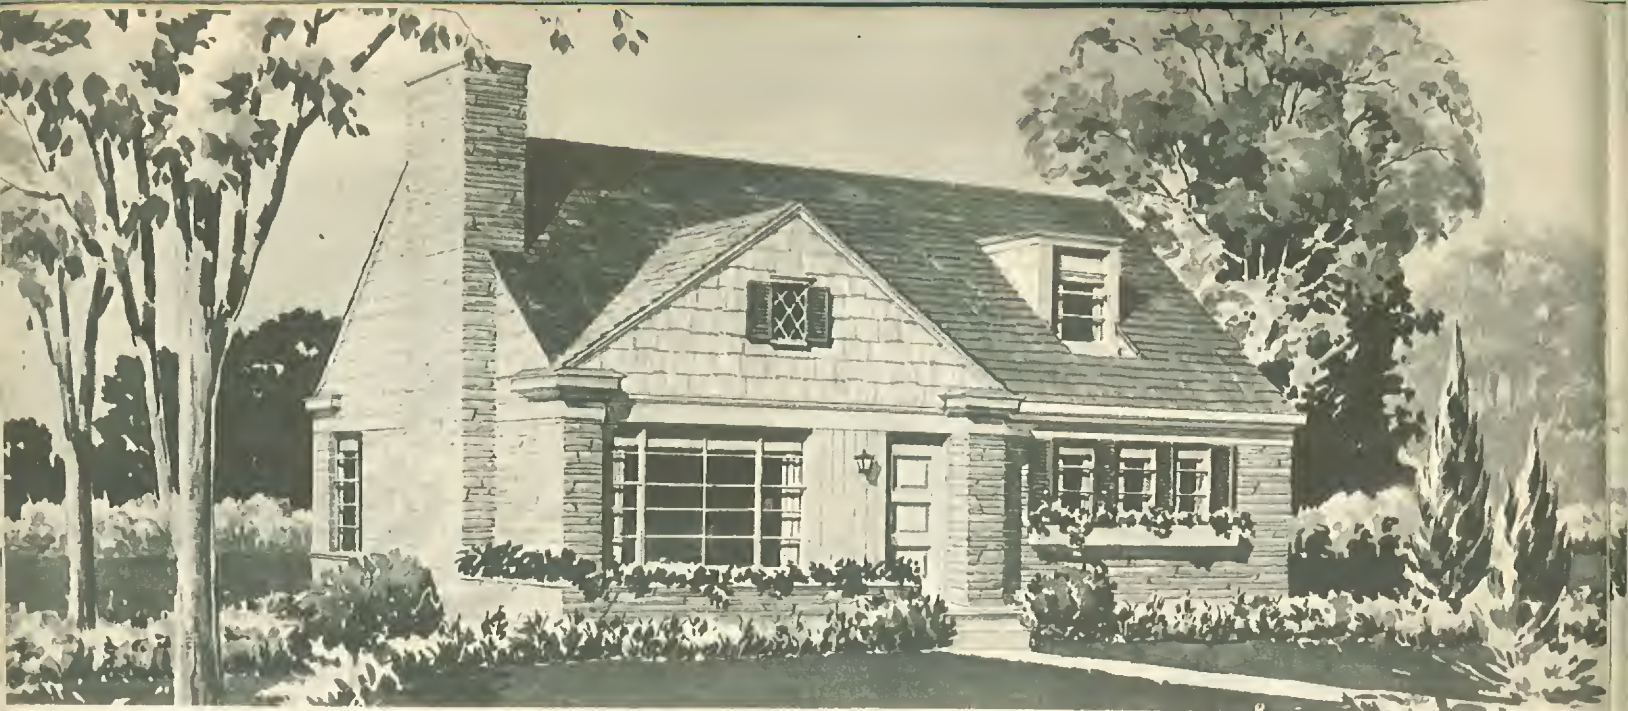

- Convenient traffic circulation.
- Private living area with a view.
- Locations of bedrooms for restful quiet.
- Spacious activities room accessible from court.
- Abundant storage areas.

Convenient Living

DESIGN D 177

2,444 Sq. Ft.
23,018 Cu. Ft.

Convenient Living

DESIGN D 374

975 Sq. Ft. (1st fl.)
466 Sq. Ft. (2nd fl.)
21,416 Cu. Ft.

FIRST FLOOR

SECOND FLOOR

Warmth and true "homey" charm are reflected in this beautiful 1½ story four-bedroom home. Lots of windows, a bath on each floor, centralized stairways, ample closet space and the roomy kitchen with snack bar assure family living at its best. A full size basement increases its living possibilities. The quarried stone and cedar shakes blend most attractively, and the exterior stability is enhanced by the projecting stone columns and planting areas.

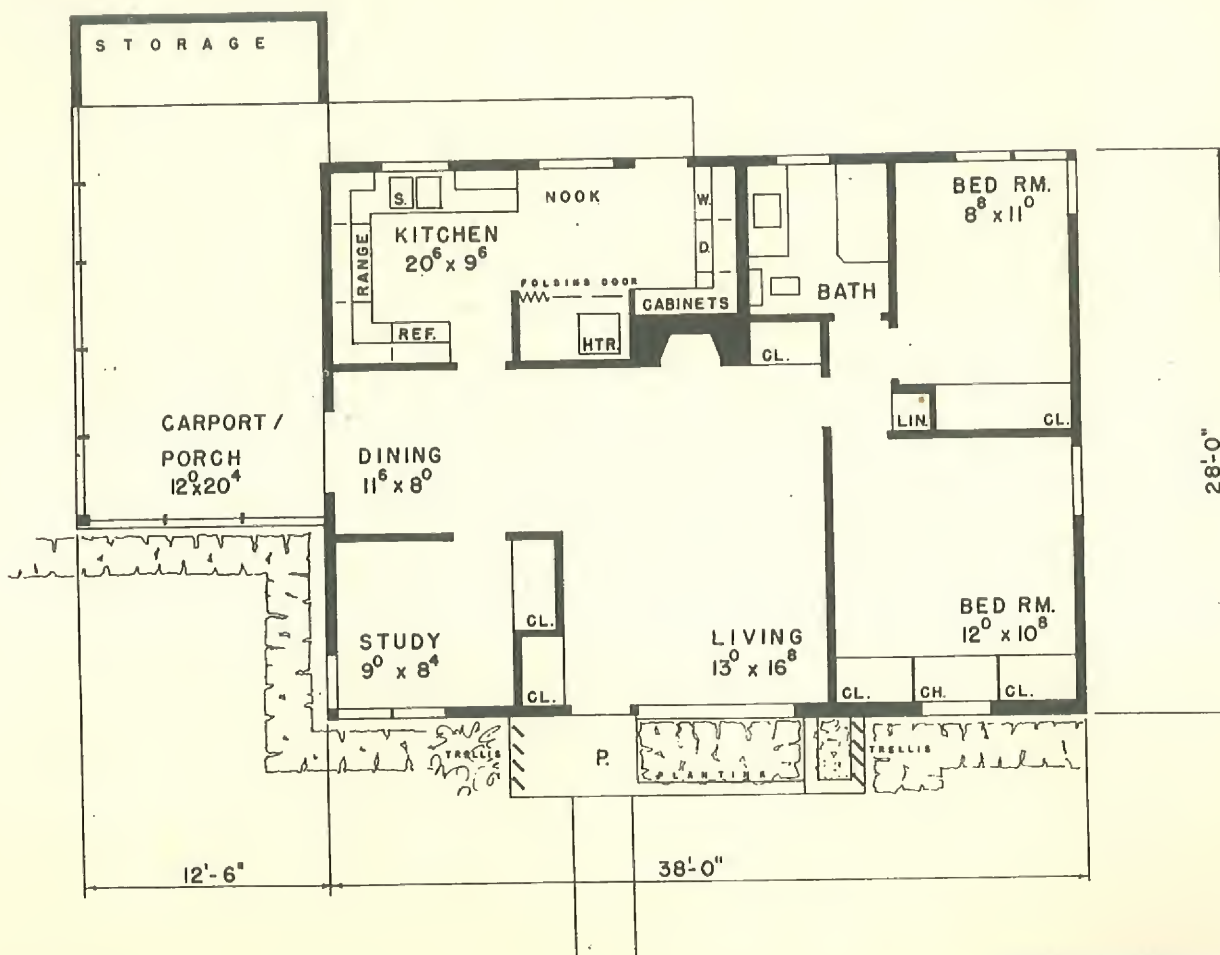

The low hip roof and spacious, flat-roofed carport/porch lend width to this smart home. The floor plan gives big-room living with moderate-sized room efficiency. The U-shaped kitchen affords ample nook and utility space. The fireplace, always in full view, adds to the feeling of size to the living and dining areas. The study is a further space bonus and the carport can be screened for a good weather living porch. The house dimensions are 28' x 38'. Hard to believe?

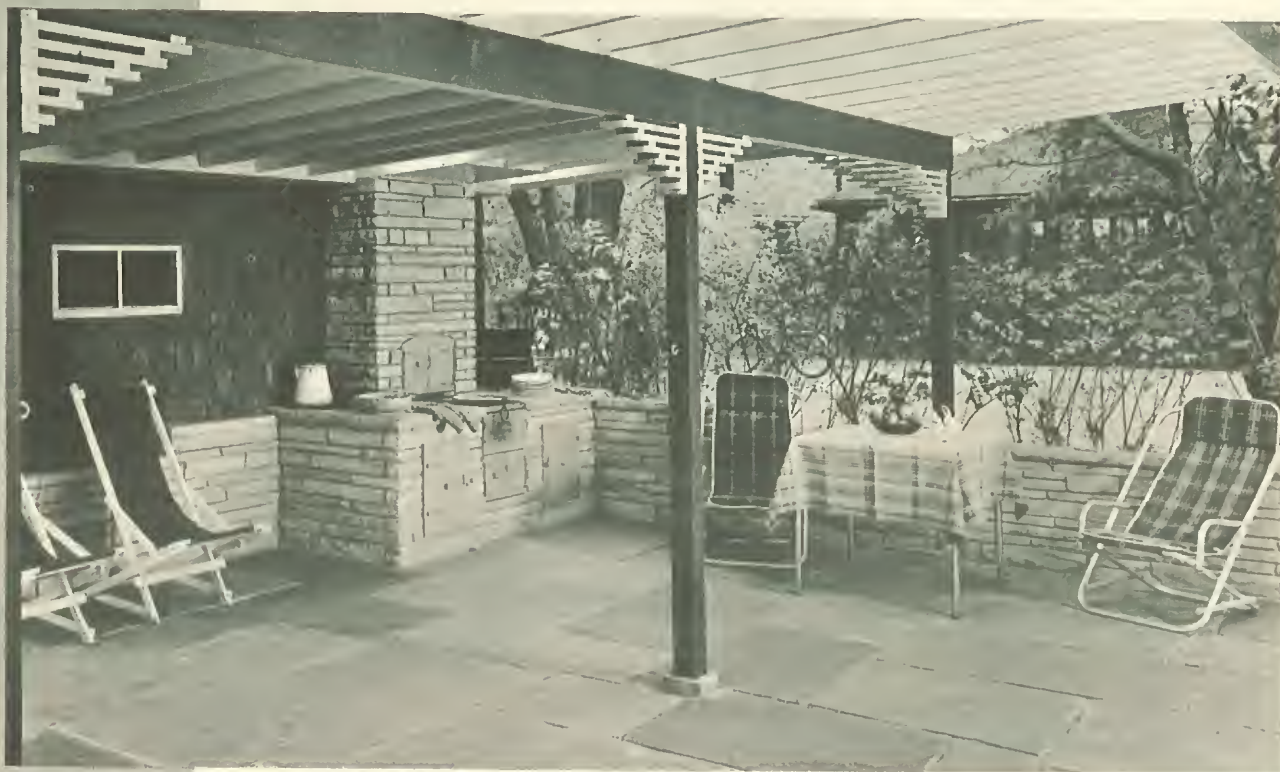

Convenient Living

DESIGN D 367

1,064 Sq. Ft.
11,970 Cu. Ft.

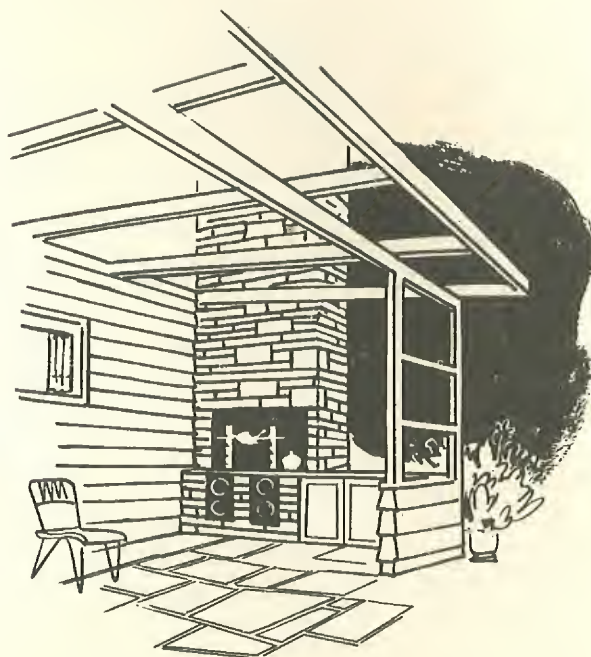

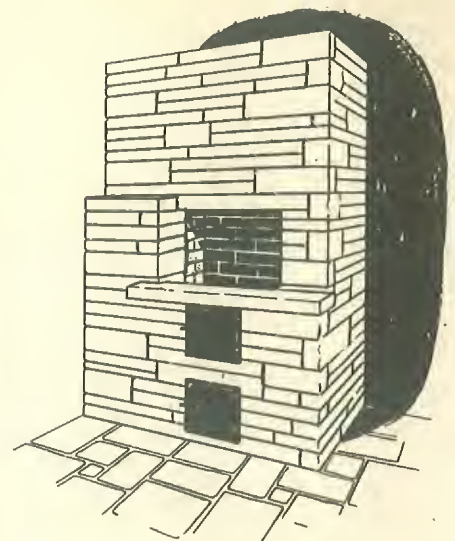

Patios and Barbecues

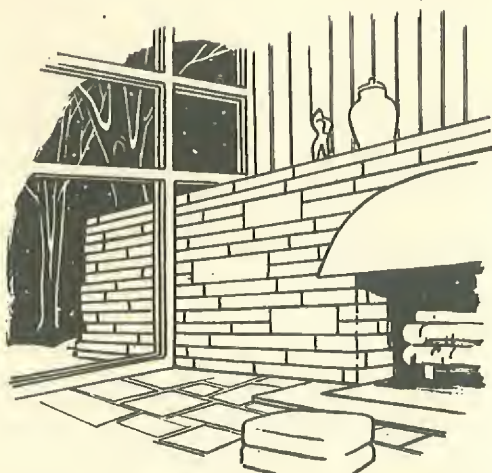

Add a little stone—and a lot of distinction—to your home. A garden-house barbecue—extended louvered roof, flagstone flooring, and barbecue fireplace, wainscoting and fence of quarried stone.

Merely the suggestion of a roof extends over this patio-porch, with its barbecue fireplace of natural stone, and its easy to care for flagstone flooring.

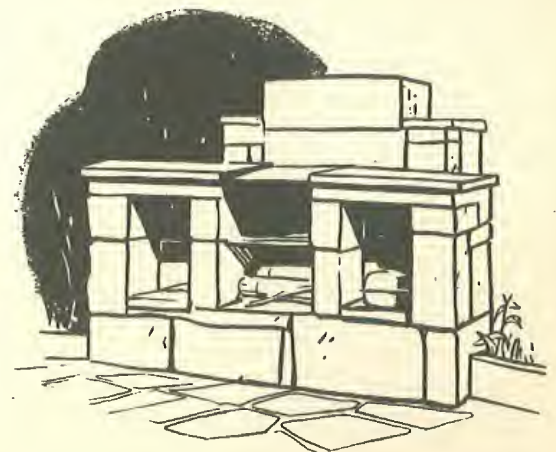

What could be handsomer or simpler than table and benches of stone, on which to sit and eat the charcoal broils that come from any of these efficient fireplaces.

Let a fireplace wall extend out of doors so your room seems much larger.

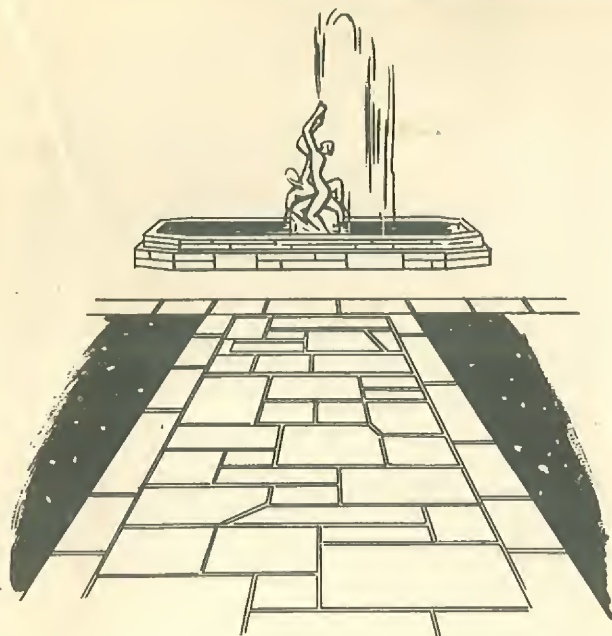

Landscape Features

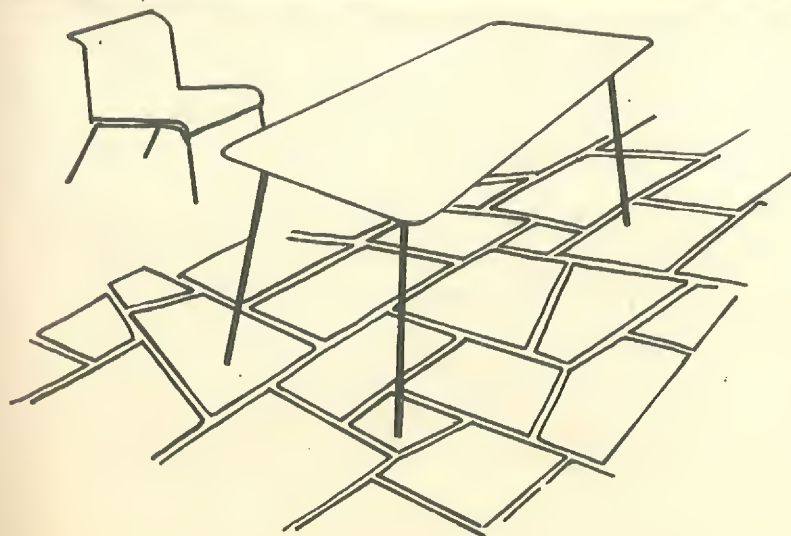

Stone fences become landscaping items when they are as beautifully designed and constructed as these—as well as serving the basic purpose of providing privacy.

This stone terrace just outside the kitchen and hobby garage is used every day.

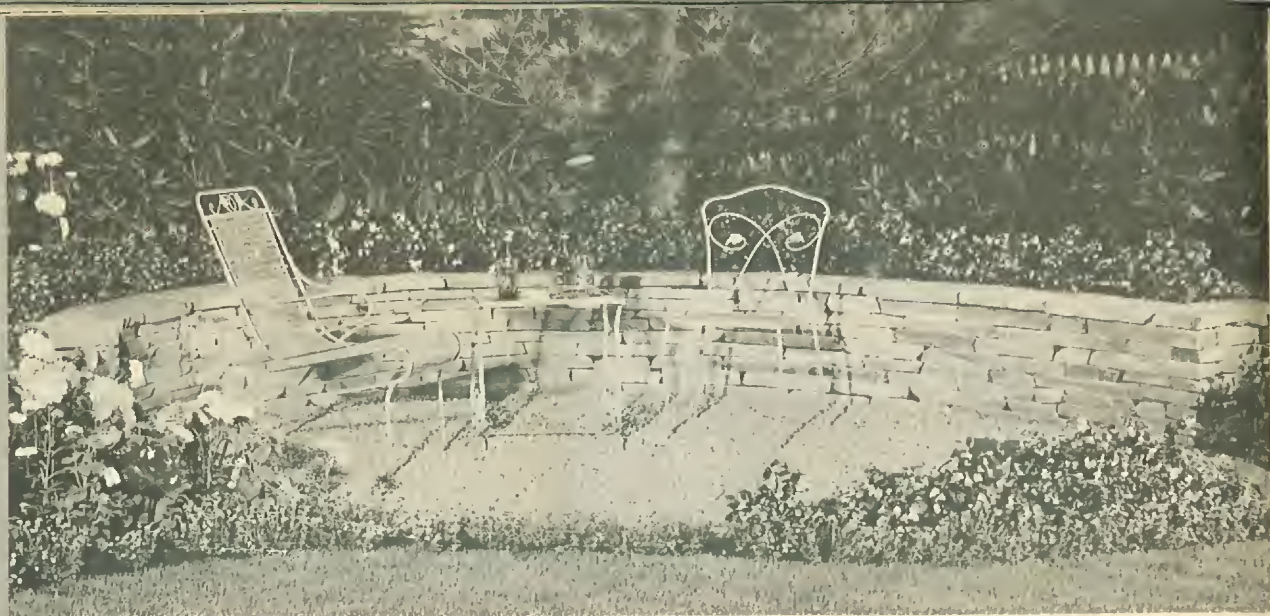

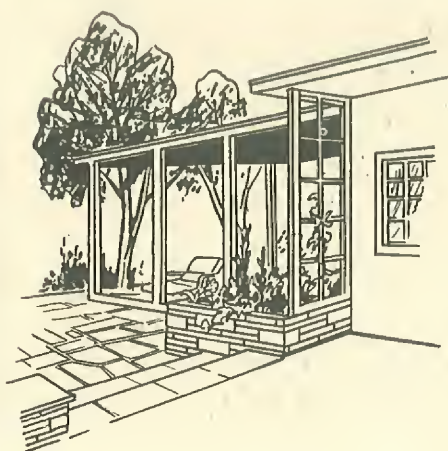

A higher terrace becomes an important landscaping project with the use of natural stone to frame the stairway, and provide planting areas delineated with natural stone.

There is as much variety possible in flagstone patterns as there are in architectural types of homes. At the top of the page, flagstone set in a very formal pattern, for a very formal walk. Below, flagstone at its most casual and modern, for a terrace.

A prize winning bit of landscaping—the use of flagstone for a dry wall, to provide a tiny out-door sitting room, surrounded by flowers. This is landscaping with great charm in a completely contemporary manner.

Just a decorative bit of stone, combined with wood and growing plants, to provide an eye-pleasing spot.

Further examples of the correct and well-planned use of natural stone, for walls, planting boxes, steps, walks. Here, a terrace; stairs to a formal garden area. Stone steps, such as these, may be obtained ready cut.

Interior Floors and Details

This informal activities room has added eye-appeal through the use of natural stone for walls. No redecorating problem here.

Flagstone is used effectively for traffic areas here—the same type of stone repeated in the fireplace wall, for color coordination.

Flagstone flooring is perfect with any style furniture. Equally perfect—because it's so easy to keep clean and sparkling—for an entrance hall, or as an extended hearth.

Interior Fireplaces

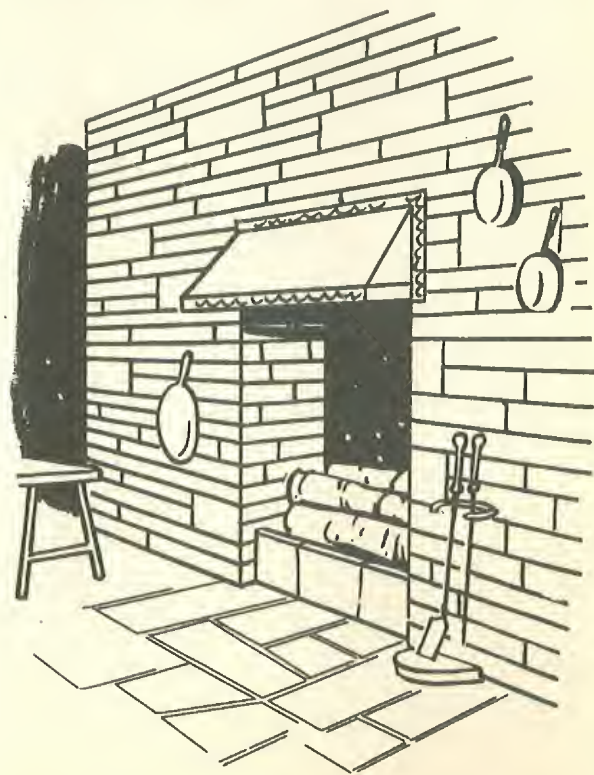

Natural stone is a completely adaptable material—as these pages of fireplaces demonstrate. It can be formal or casual with equal facility.

Here, large fireplaces for country houses.

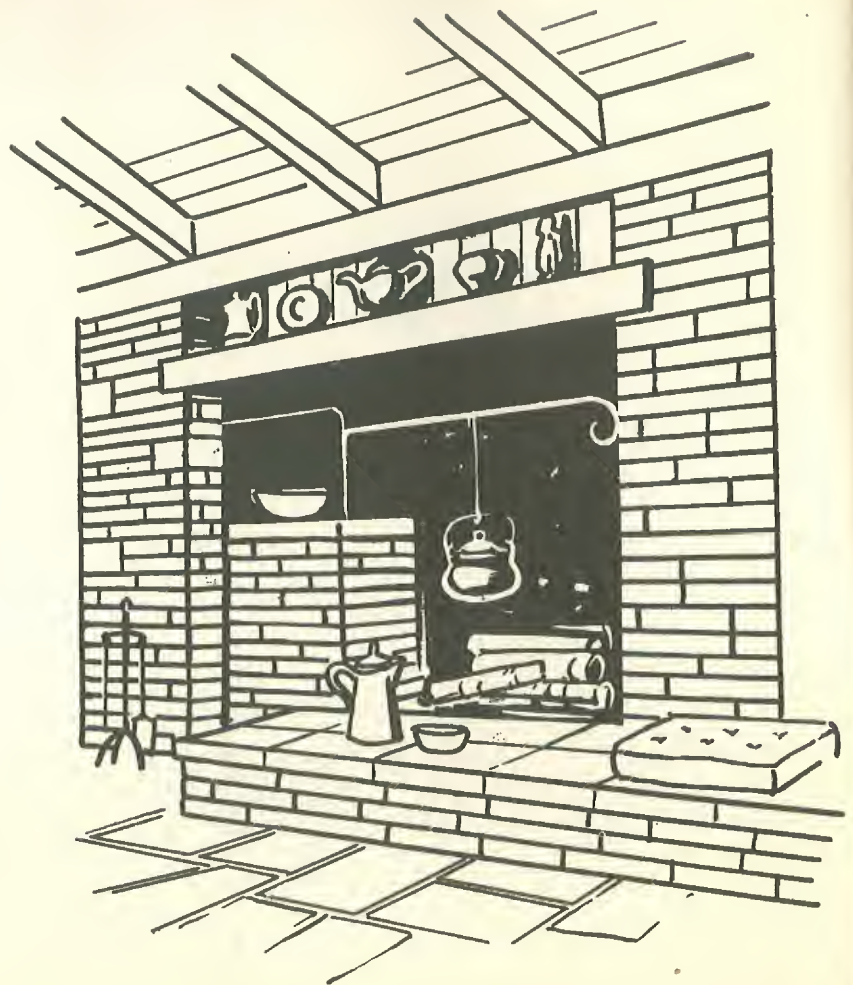

Three fireplaces for kitchen or activities rooms, and directly below, a quite formally designed fireplace for a living room.

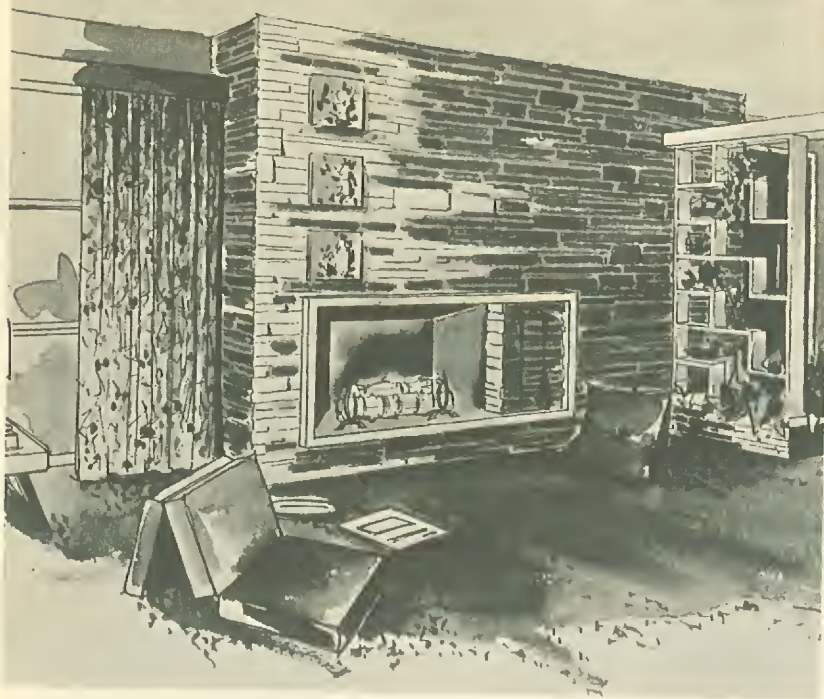

This massive bar of split face stone has a pass-through to the kitchen.

Right: Handsome design for a fireplace which might be added to a huge kitchen, or incorporated in an activities room.

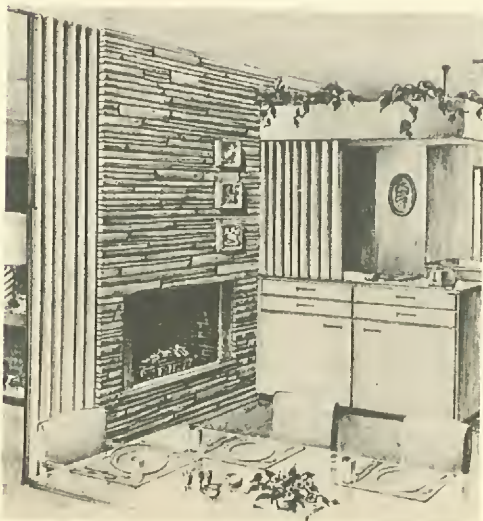

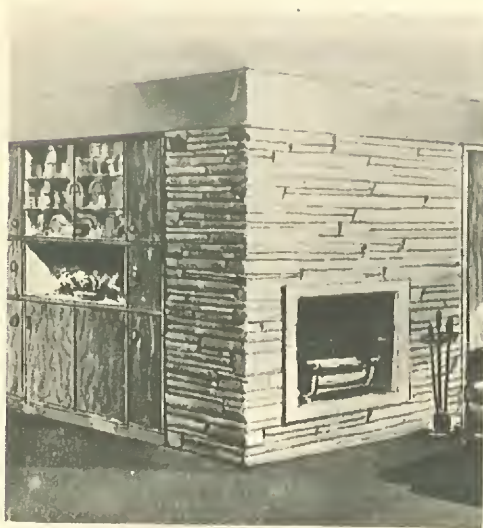

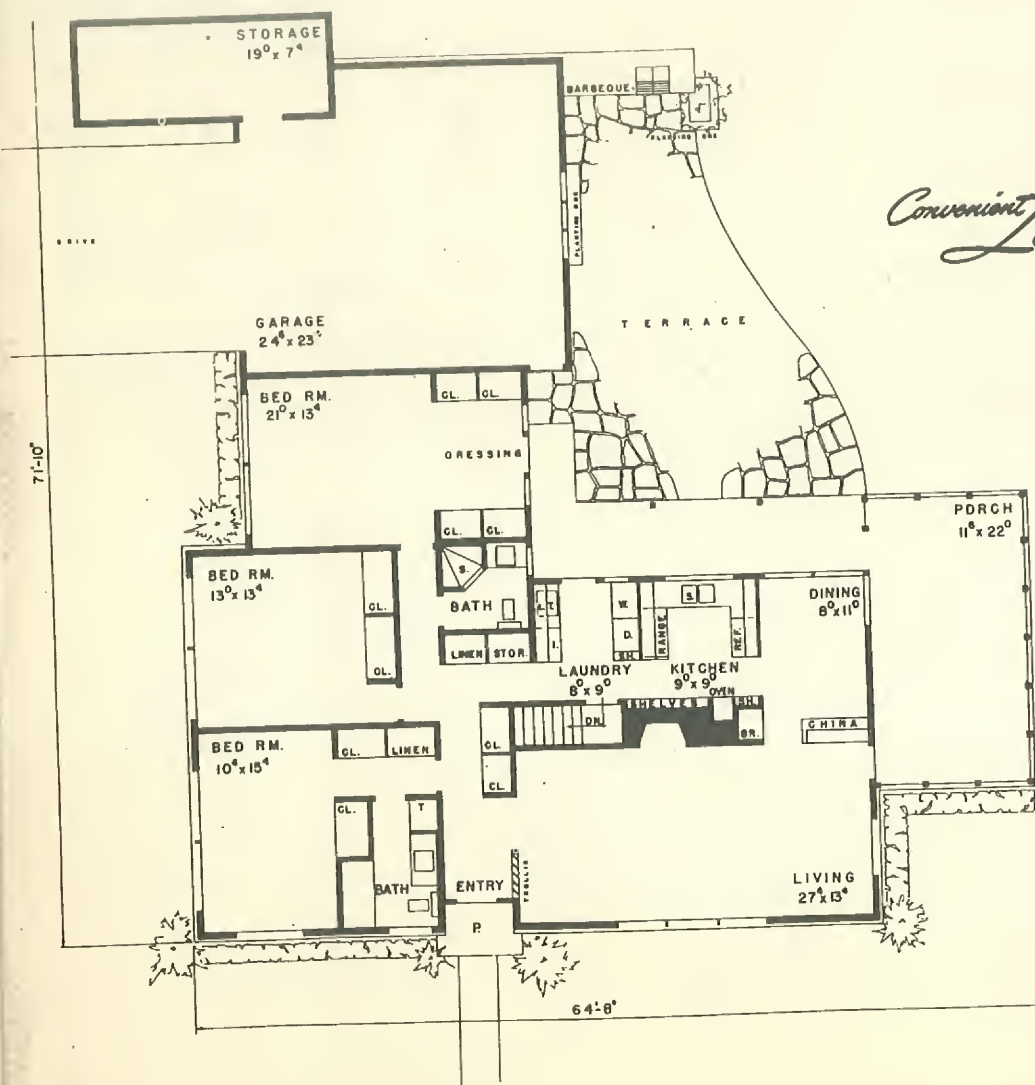

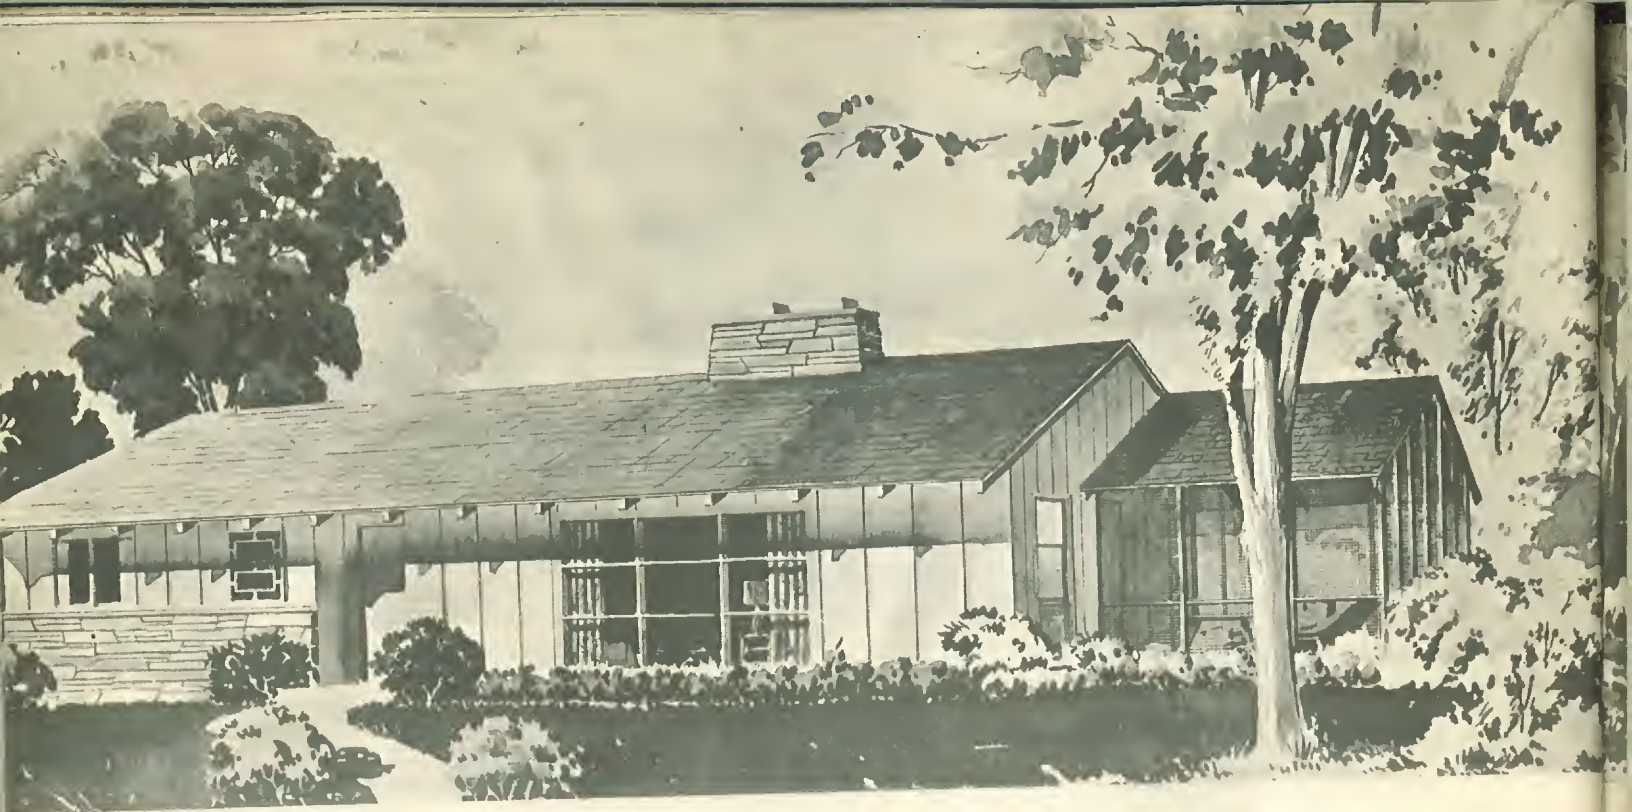

Left: A fireplace looks cool in the summer and warm in the winter.

Below, left: Stone fireplaces and built-ins compliment each other.

Below: This two-way fireplace wall of natural stone serves both the living and the dining areas.

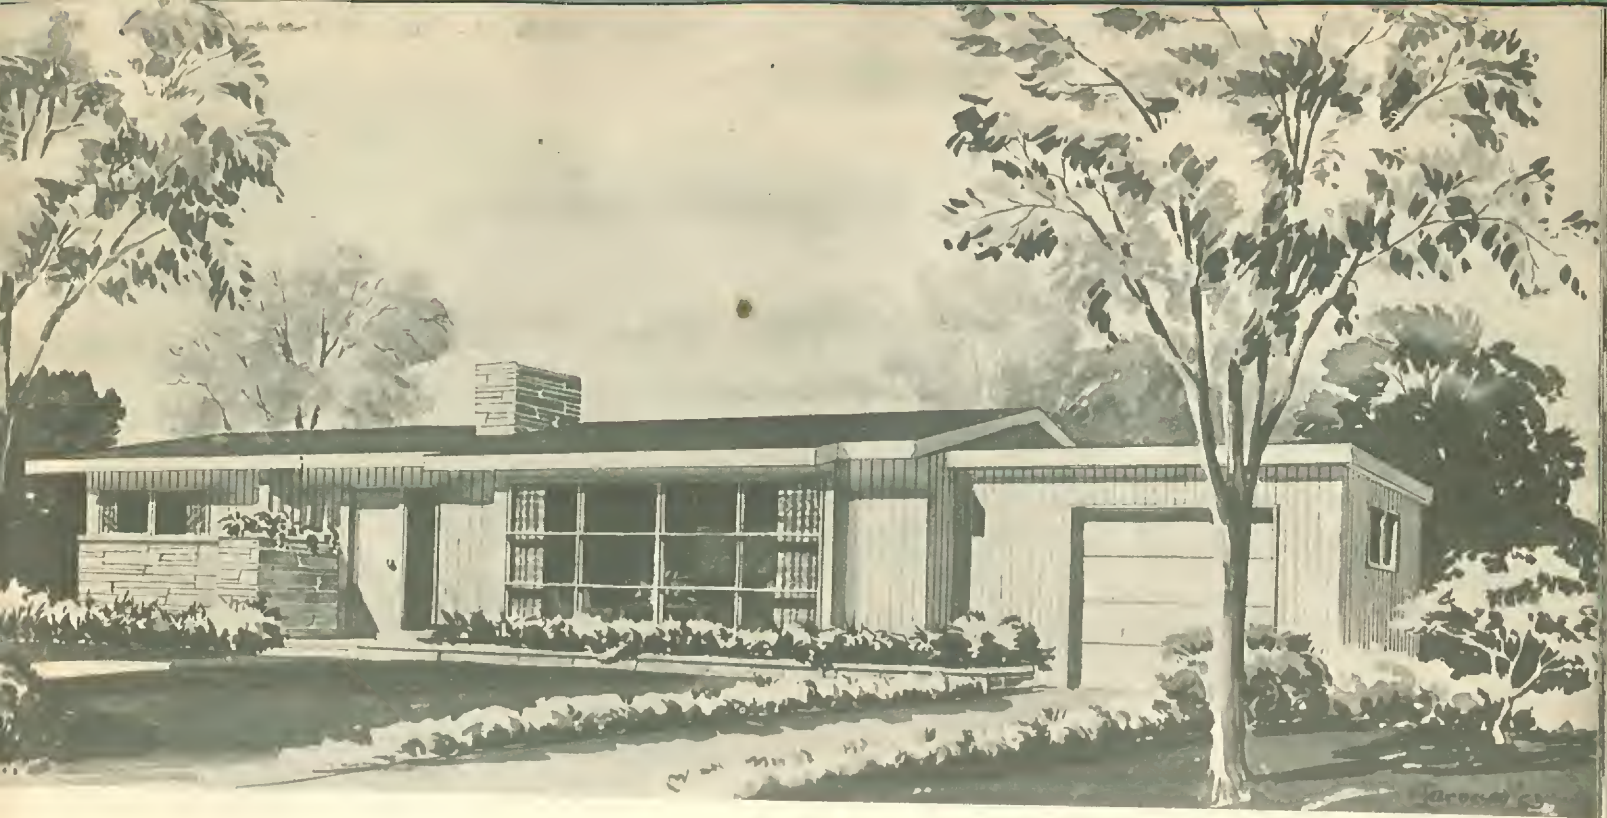

Convenient Living

DESIGN D 355

1,838 Sq. Ft.
34,682 Cu. Ft.
Excluding Garage

For those who love large bedrooms, this is the "just-what-we-wanted" home that offers that enjoyment at no sacrifice to other room space. Here is a masterpiece of floor planning which gives the owner easy access to all areas while preserving bedroom privacy. Look at the closet space. The living room is large and well lighted. The efficiency kitchen and dining area is intimate but not cramped. The porch and terrace with barbeque area embrace this home with solid comfort—ranch-type design at its best. Wide roof overhang, and vertical board and batten exterior with just the right touch of stone complete the "look."

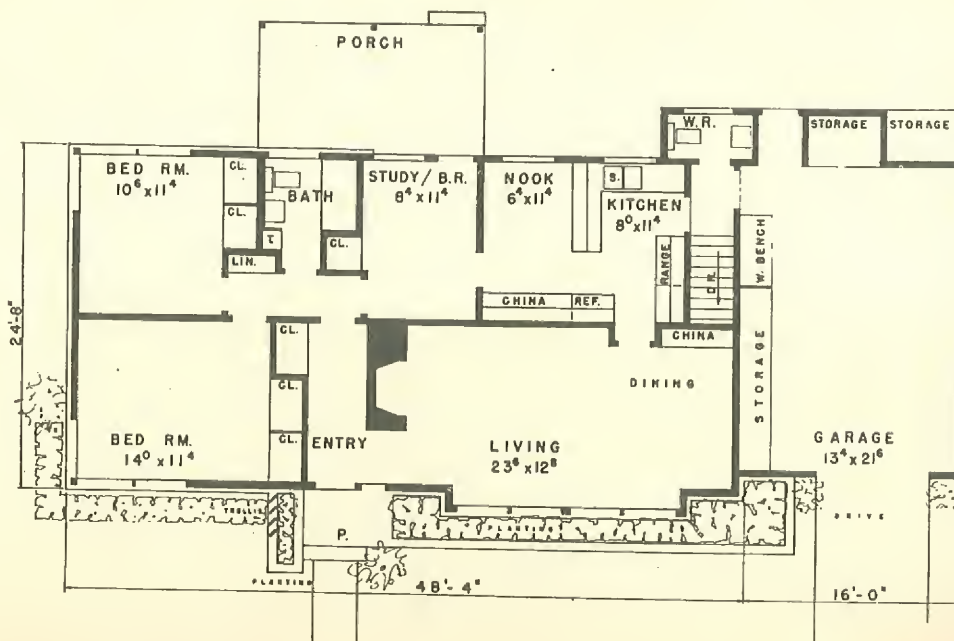

This substantial home is ideal for diversified living. It has two built-in china cabinets so that the study/bedroom could be used as a formal dining room. This would leave the dining end of the living room for books and as a study corner. Or, the wall between the study and nook could be eliminated to form a living-kitchen area with a pleasant porch for warm weather relaxation. The wide fireplace and chimney and the large panel window augment both the size of the living room and the overall exterior of the home. The garage, with three large storage areas (one of them accessible from the outside), a handy washroom, and space for a work bench, will be Dad's domain if he can win his battle to keep it from the rest of the family!

Convenient Living

Convenient Living

DESIGN D 256

1,732 Sq. Ft.
19,052 Cu. Ft.
Excluding Garage

Here is contemporary design with pleasurable living. Each bedroom has built-in wardrobe closets. The activities room as well as the living room has a fireplace. The built-in oven, range top and griddle of the natural wood kitchen are up to the minute. The barbeque terrace and after-bathing shower in the garage provide unexcelled summer enjoyment. Laying the front walk and terrace with quarried stone will preserve that well trimmed appearance.

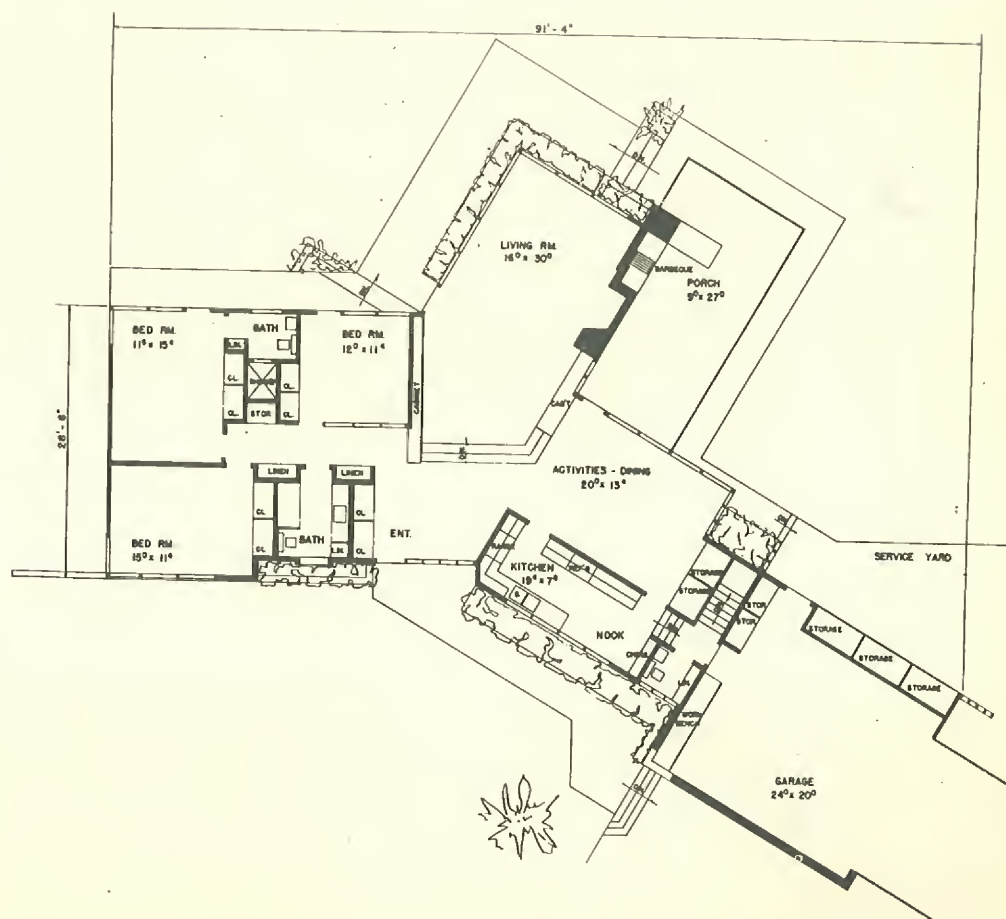

Convenient Living

DESIGN D 271

2,104 Sq. Ft.
21,329 Cu. Ft.
Excluding Garage

The sunken living room with glass walls on two sides makes this stone and redwood home ideal for a sloping lake site, or one overlooking a pleasant view. The large screened-in barbeque porch and the spacious activities dining area make entertaining no problem at all. There are twenty-one storage, wardrobe and linen closets! Count them.

FOR WATERFRONT LIVING — either design shown here may be the solution to your search for a lake-lot home.

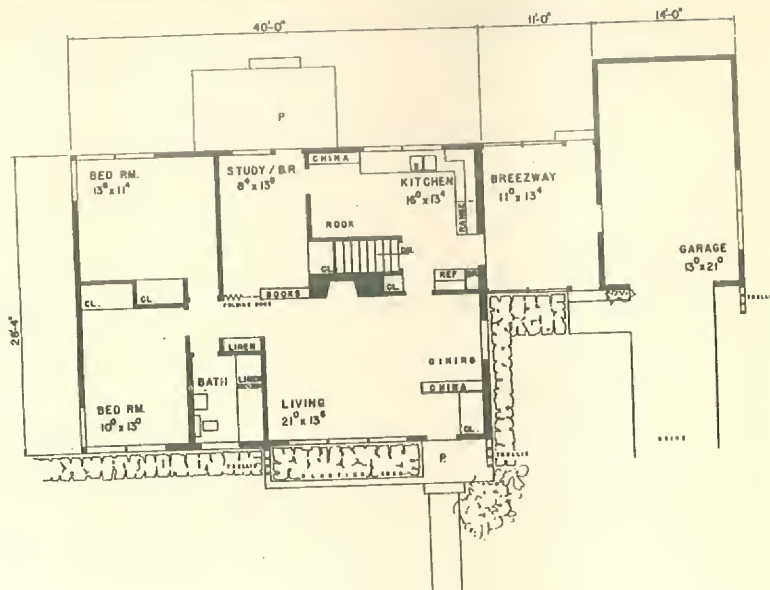

Convenient Living

DESIGN D 179

1,132 Sq. Ft.
22,086 Cu. Ft.
House only

The ideal combination of compactness and roominess is embodied in this well-balanced alignment of home and garage. The roomy breezeway can easily be converted to add living space. The quarried stone will lend itself beautifully to the landscaping of the grounds.

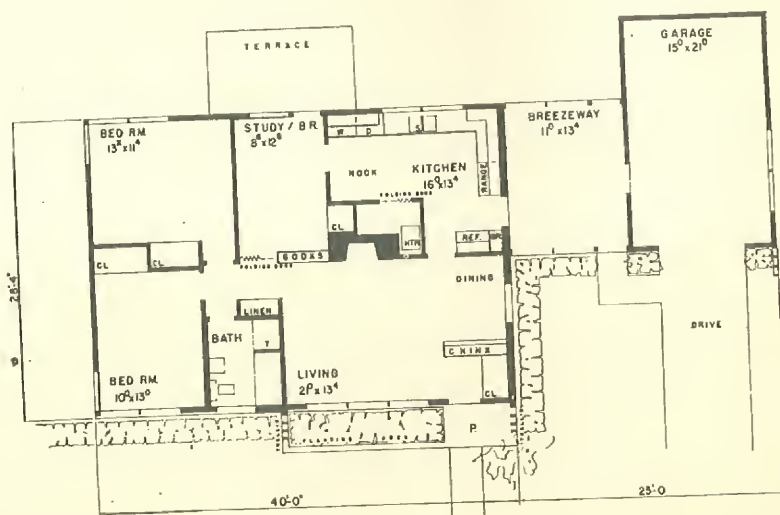

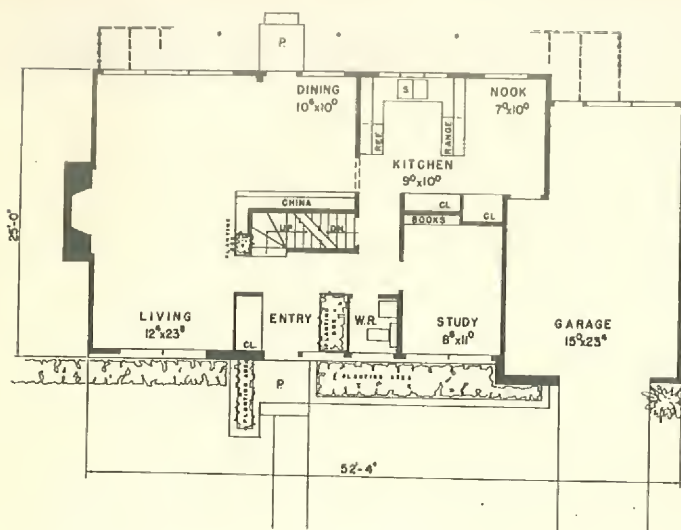

Convenient Living

DESIGN D 180

1,132 Sq. Ft.
13,030 Cu. Ft.
House only

The same charming exterior applies to this basementless plan. Room arrangement remains the same when the stairway is eliminated. One of the two chinas are replaced with a washer and dryer for a first floor laundry; and additional storage is provided in the heater room.

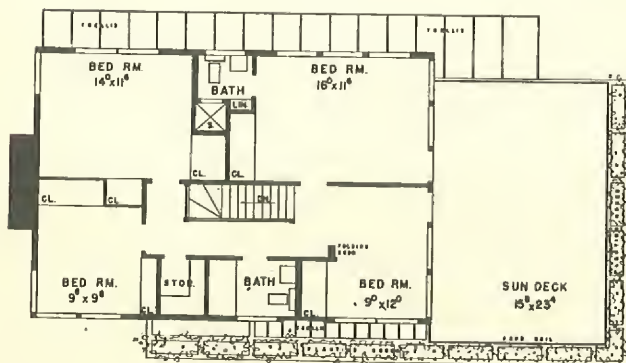

Convenient Living

DESIGN D 338

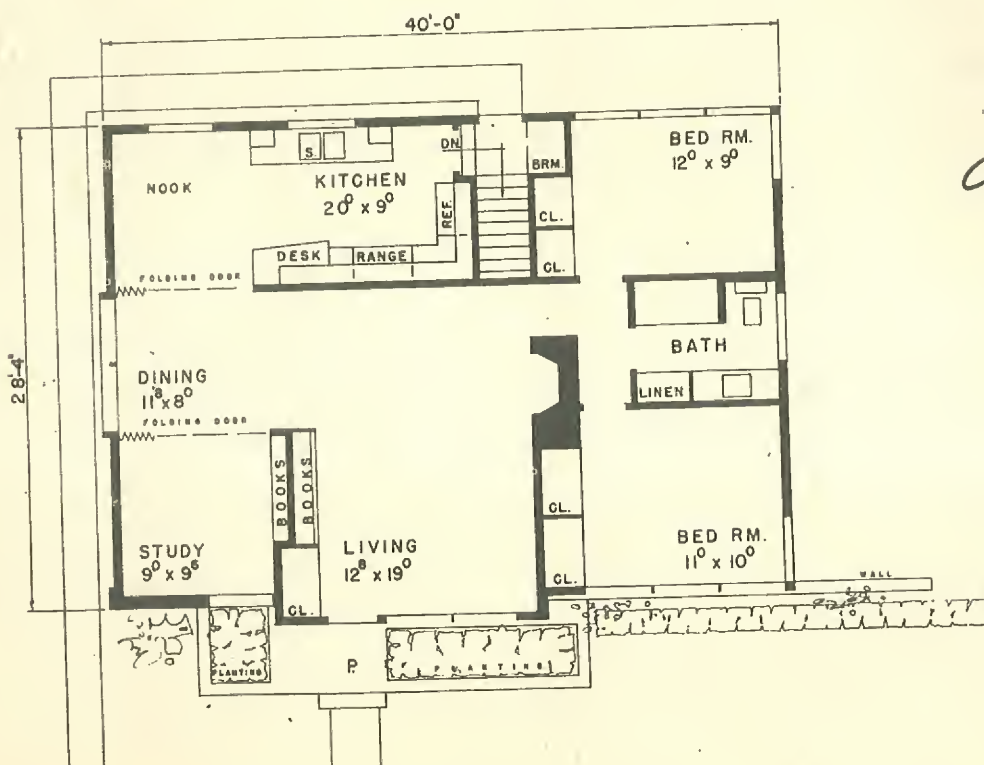

969 Sq. Ft. (1st fl.)
920 Sq. Ft. (2nd fl.)
24,238 Cu. Ft.
Excluding Garage

From living room fireplace to upstairs sun deck this compact but roomy two story suburbanite offers an impressive simplicity compatible with any preference in interior appointments. Privacy without isolation is possible if desired, or group activity may be enjoyed. There are four bedrooms, two baths and plenty of closet-storage space on the second floor, with a centrally located stairway. Notice the huge china in the dining area. Sleek but substantial exterior is effected by contrasting vertical and horizontal board lines with the lower facade of quarried stone. A fine family home in the modern tradition.

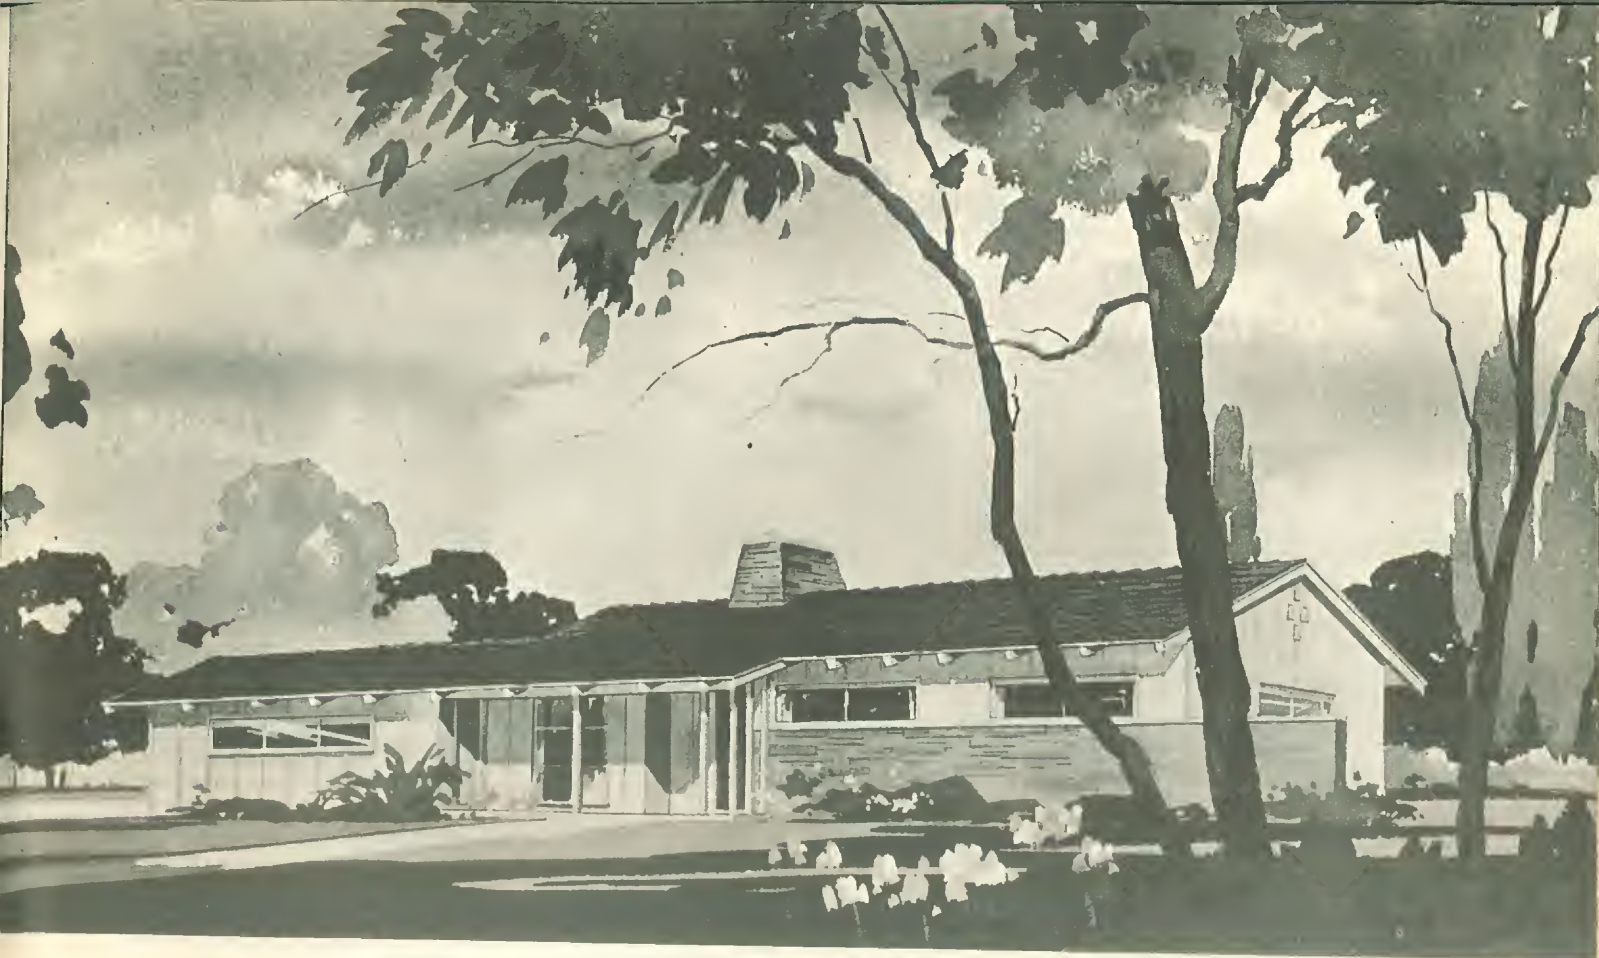

This charming modern with its built-in features will give you the most of the best in *Convenient Living*. Notice the folding doors which can be installed to alter the shape and size of three areas. Here is beauty in glass and stone, accentuated by the wide, low roof.

Convenient Living

DESIGN D 360

1,153, Sq. Ft.
20,140 Cu. Ft.

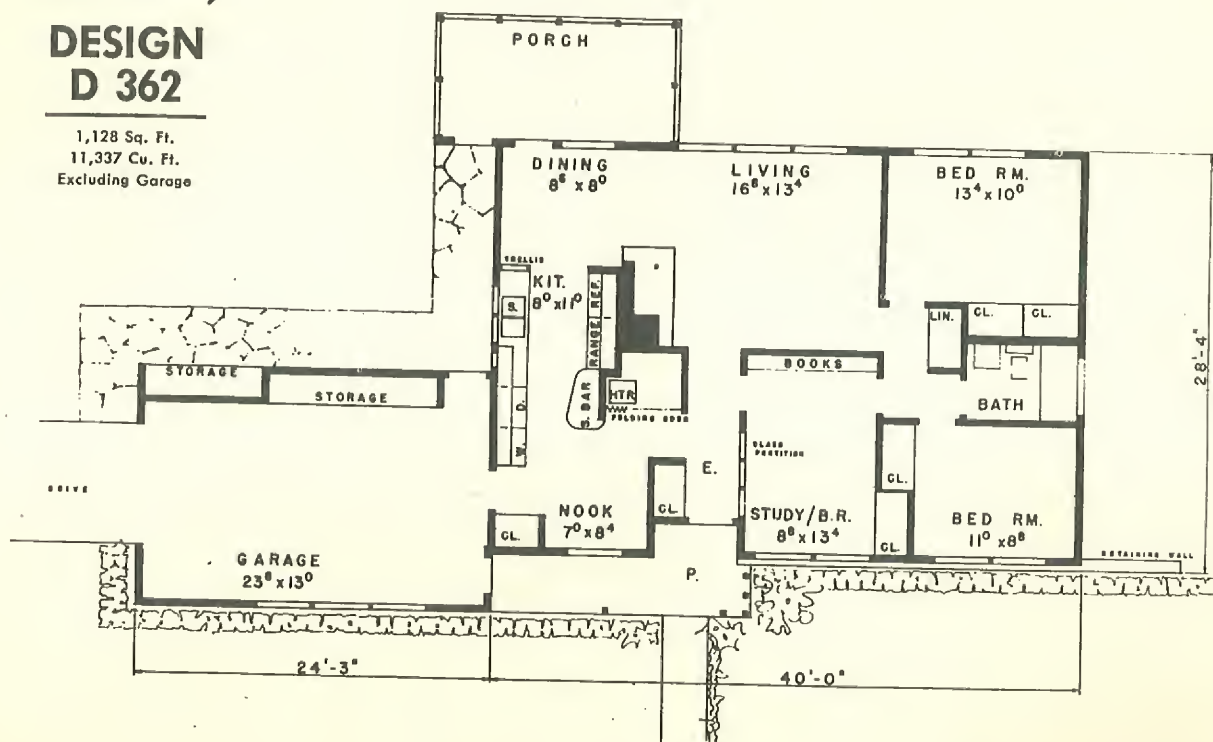

Convenient Living

DESIGN D 362

1,128 Sq. Ft.
11,337 Cu. Ft.
Excluding Garage

Beauty and practicality, the heart's desire of the ranch-style home owner, are soundly applied here. The built-in kitchen arrangements, the combined study and bedroom, the high-sill windows which allow leeway in furniture placement, will make the owner's enthusiasm contagious. And who wouldn't be happy with all that garage storage space! Noteworthy is the quarried stone front which continues as a retaining wall to give width and landscaping possibilities.

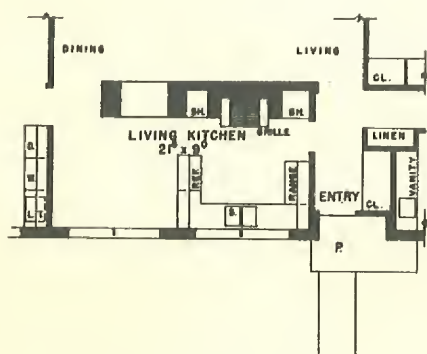

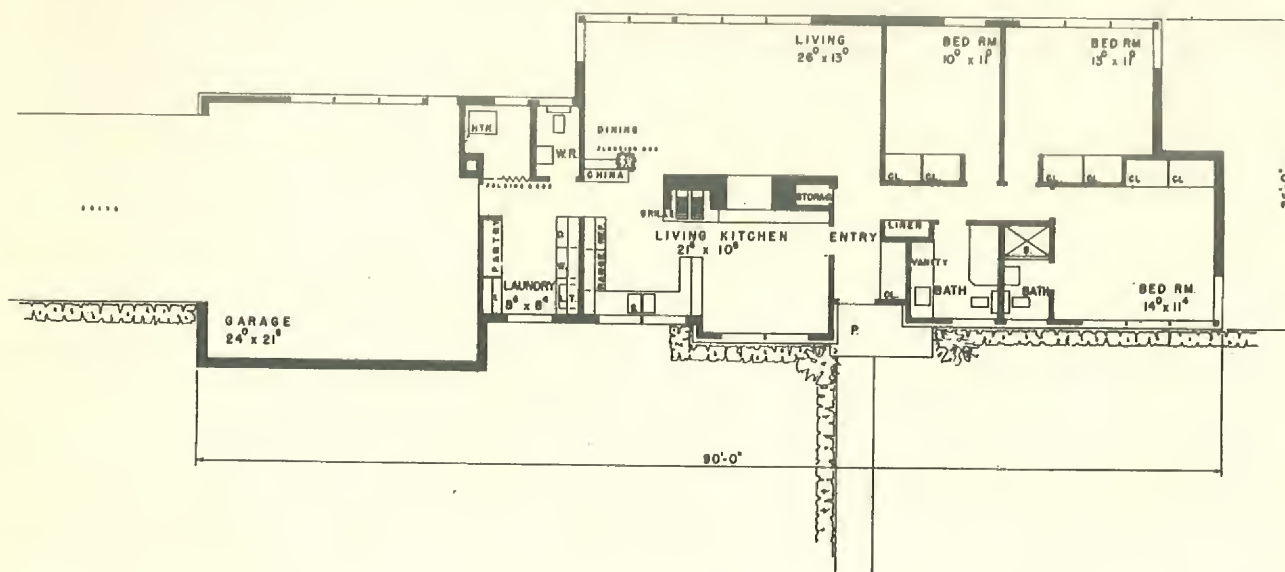

DESIGN D 291

Attractive in any material but captivating in quarried stone, this smart home is the essence of contemporary design. It is outstanding (but not dominating) on hilltop or level ground. You can see it in full color on the front cover. The advantages of wide roof overhang and adequate lighting are both retained by the location and size of the windows. The salient features of its precise, finely proportioned interior are the large living room and the abundance of closet space throughout. Are these "ultra-modern" homes livable? Here's your answer!

Imaginative floor planning makes possible this alternative in the placement of the kitchen, grille and two-way fireplace. The available blueprints show both arrangements.

Convenient Living

DESIGN D 377

1,648 Sq. Ft.
17,806 Cu. Ft.
Excluding Garage

Long, low and luxurious, this spacious *Convenient Living* home embodies all the atmosphere usually found in the finest residential sections. It is particularly suited to a corner lot. Its predominance of quarried stone is beautifully balanced by the centered alignment of the large panel window and large stone chimney. There are two distinct living areas, with the two-way fireplace serving both. The living-kitchen also contains a grille. The closet space in this home emphasizes the word Convenience, as do the three ample bedrooms and the two and one half bathrooms.

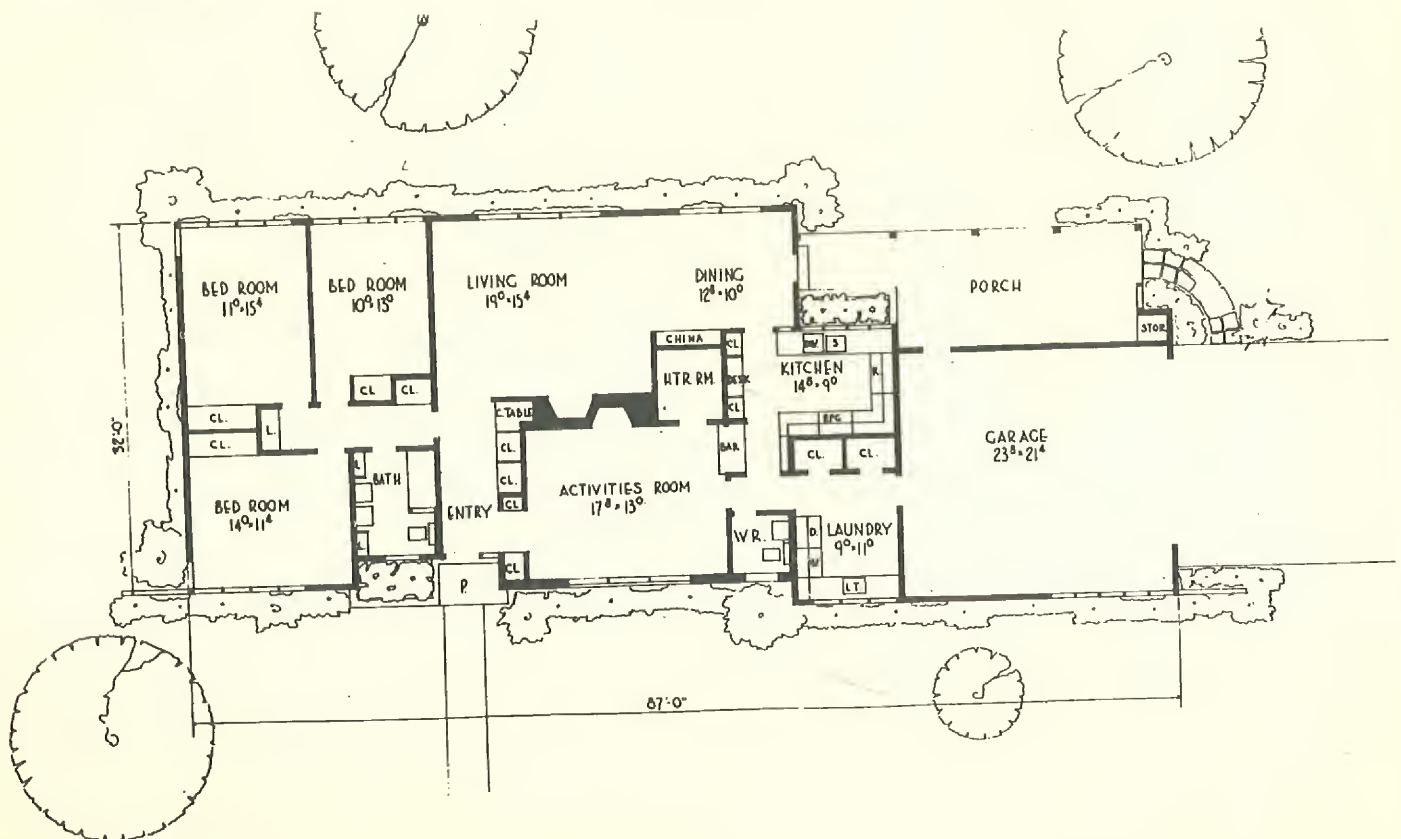

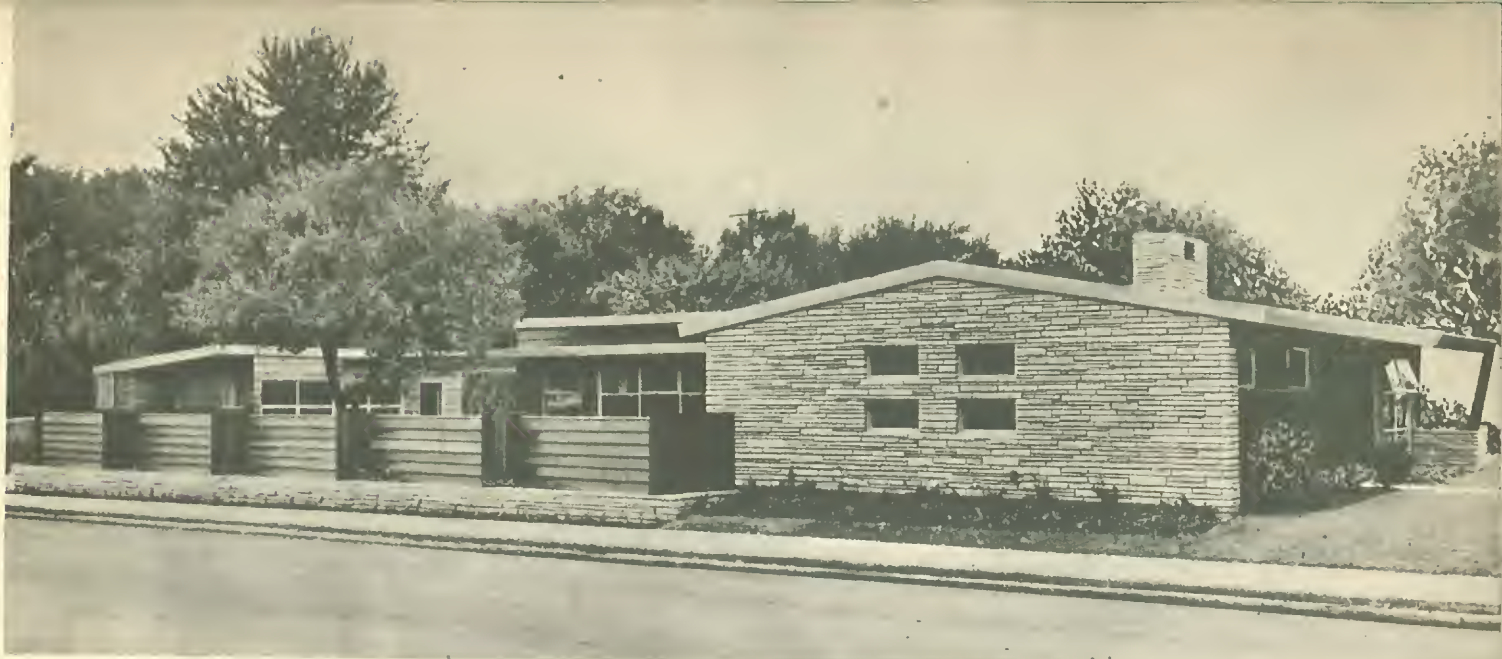

Convenient Living

DESIGN D 167

1,914 Sq. Ft.
22,968 Cu. Ft.
Excluding Garage

Here's a home for truly gracious living. Spaciousness combined with plenty of windows and an open plan arrangement provide a feeling of freedom and cheerfulness. Some of the features include seventeen closets, double lavatory bath, extra washroom, built-in china cabinet, planning desk in kitchen, bar located to serve both activities and kitchen, a covered porch, and two fireplaces. The activities room could also serve as a quiet study or guest room.

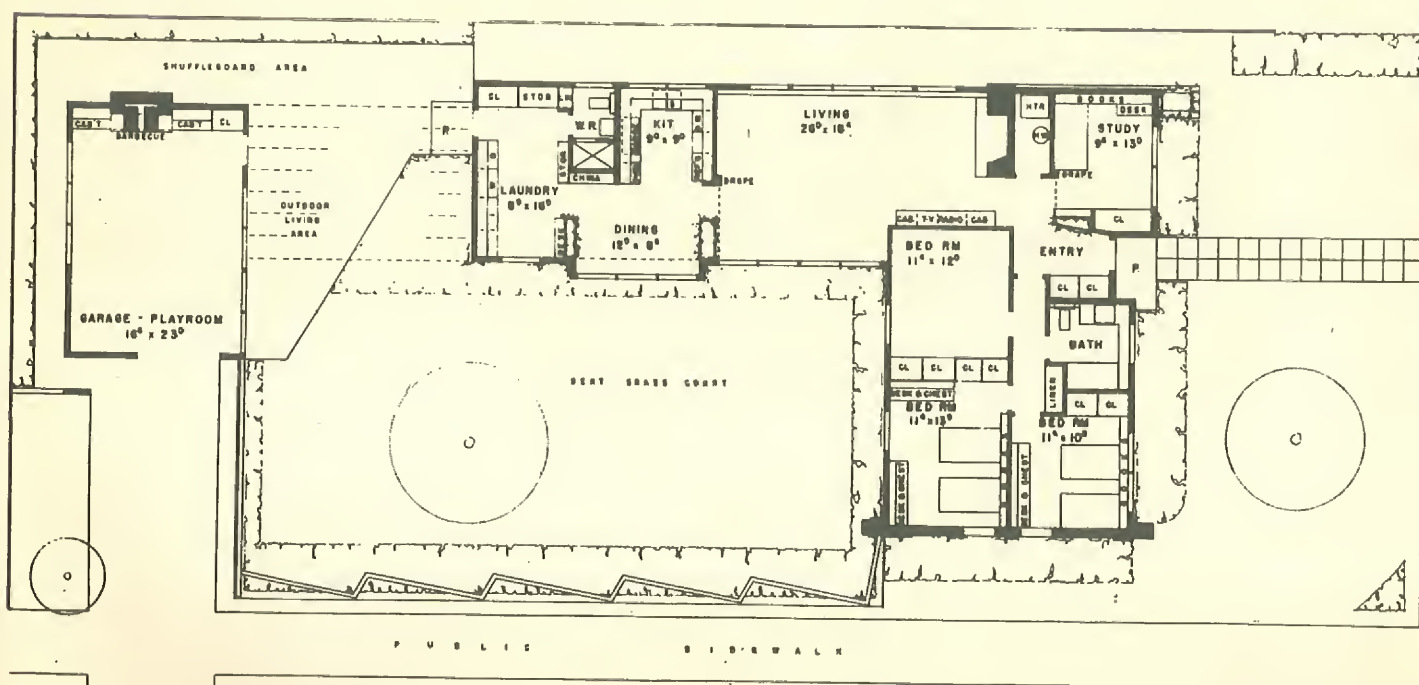

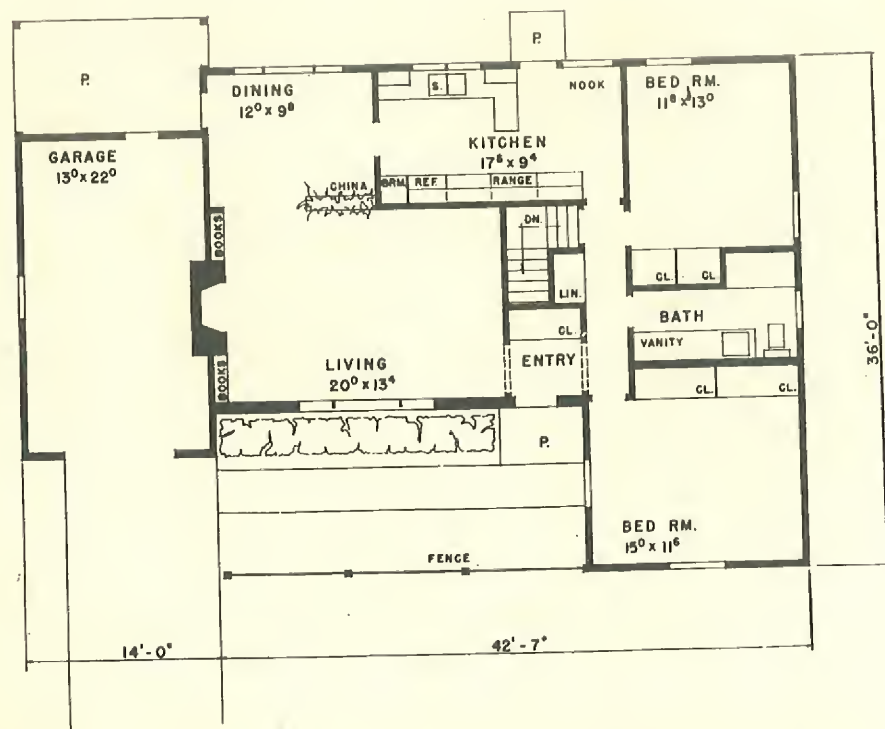

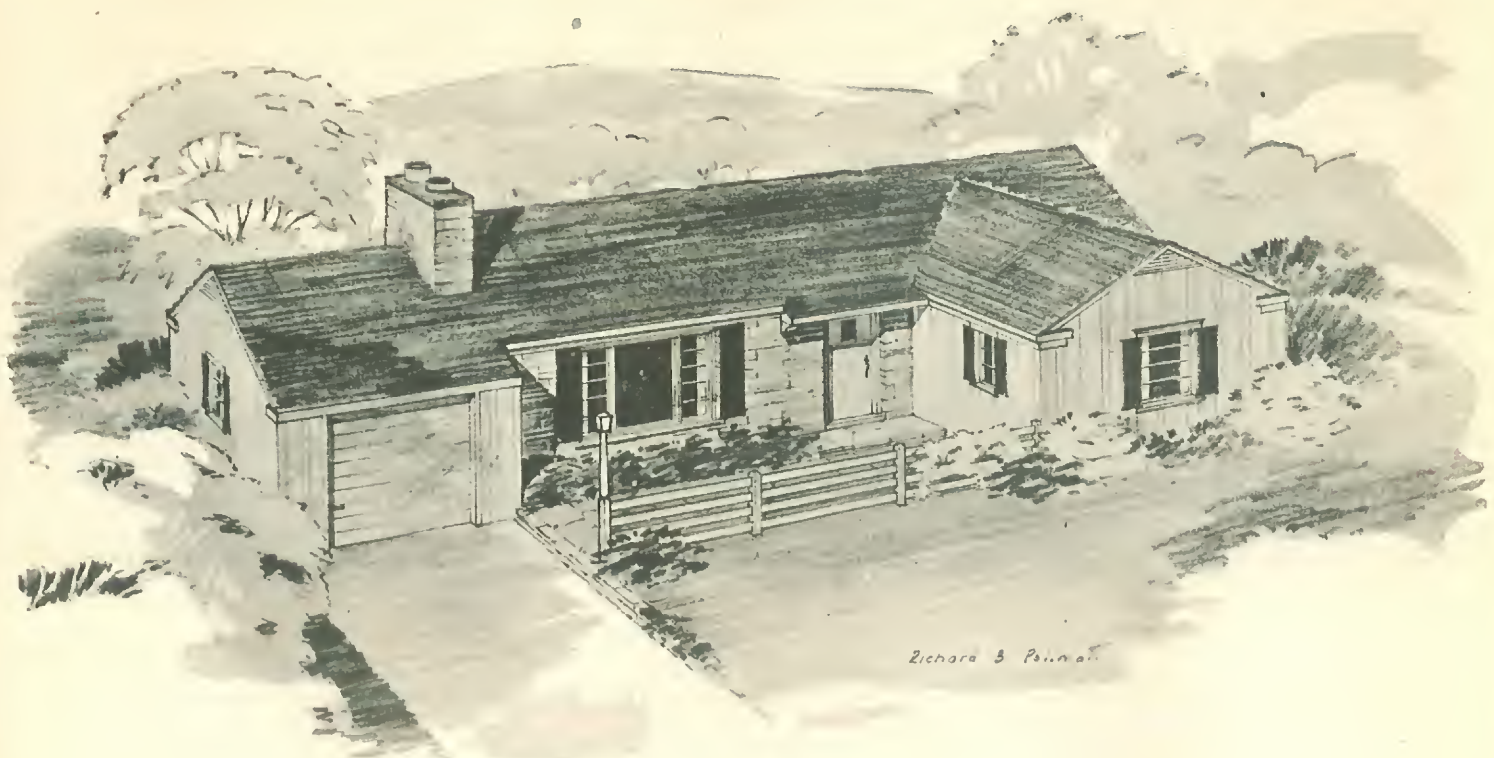

This home was designed to meet the exacting requirements of a small corner city lot paralleling a busy thoroughfare. The designed fence with natural stone will provide privacy from the street, despite the large glass area on the living-dining side. A house with one side of stone presents an attractive change of pace. Consider this floor plan carefully. The sleeping and the working areas at the wings of the house with the living area in the middle guarantee a separation of functions so important in easy, pleasurable living.

Convenient Living

DESIGN D 288

1,752 Sq. Ft.
17,133 Cu. Ft.

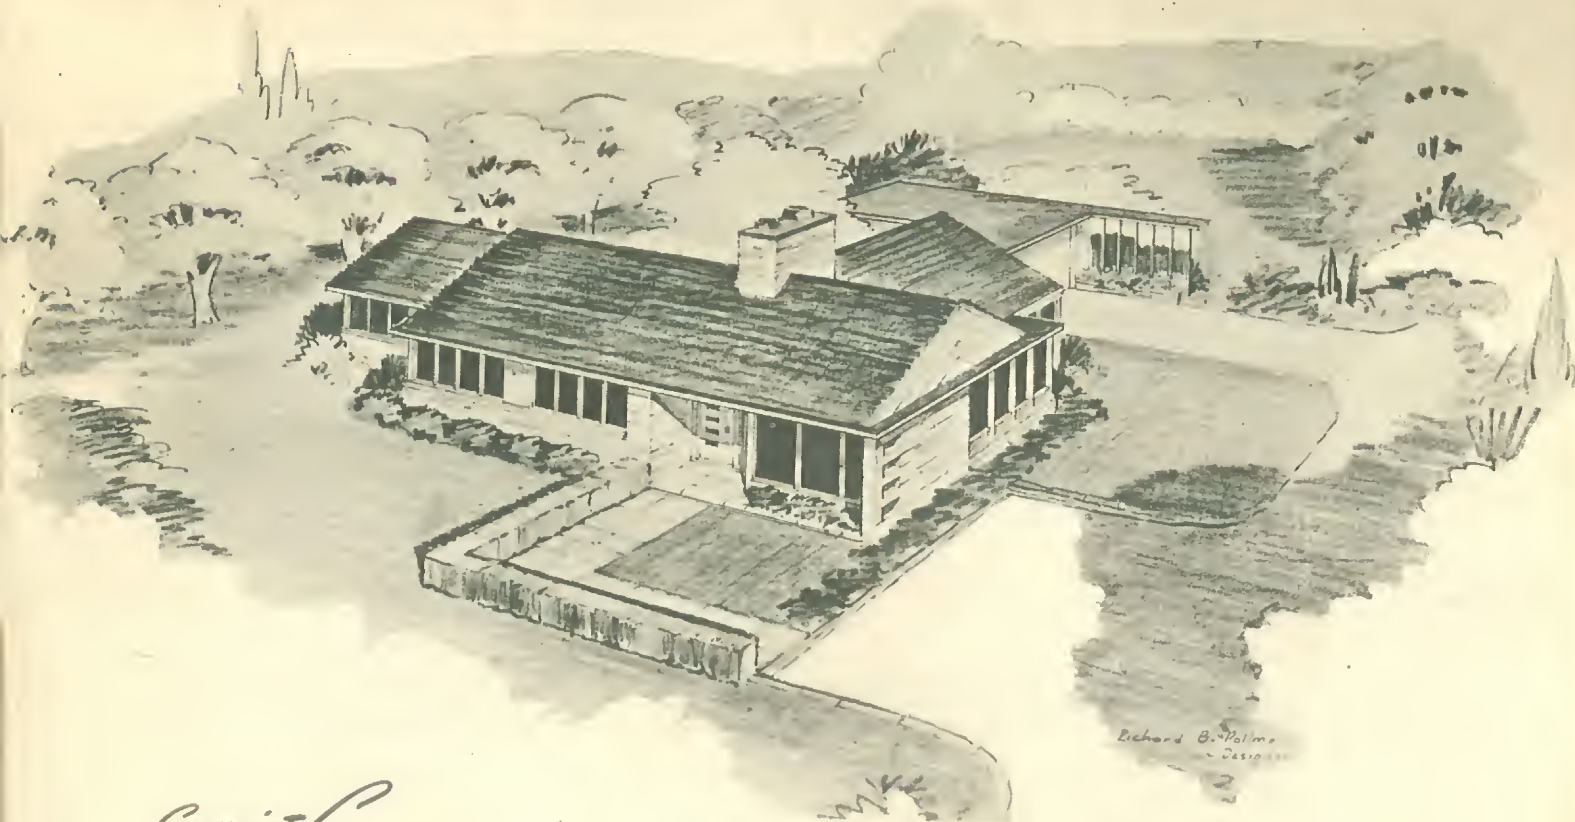

Convenient Living

DESIGN D 89

1,232 Sq. Ft.
22,714 Cu. Ft.
Excluding Garage

Note the excellent traffic circulation, the dining area separated from the living room by a china cabinet and with a planting box on top, the charm of bookshelves on each side of the fireplace, the double wardrobe closets in each bedroom, the nook, and the large vanity. The natural stone front and walk go so well with this design that we can't imagine it any other way.

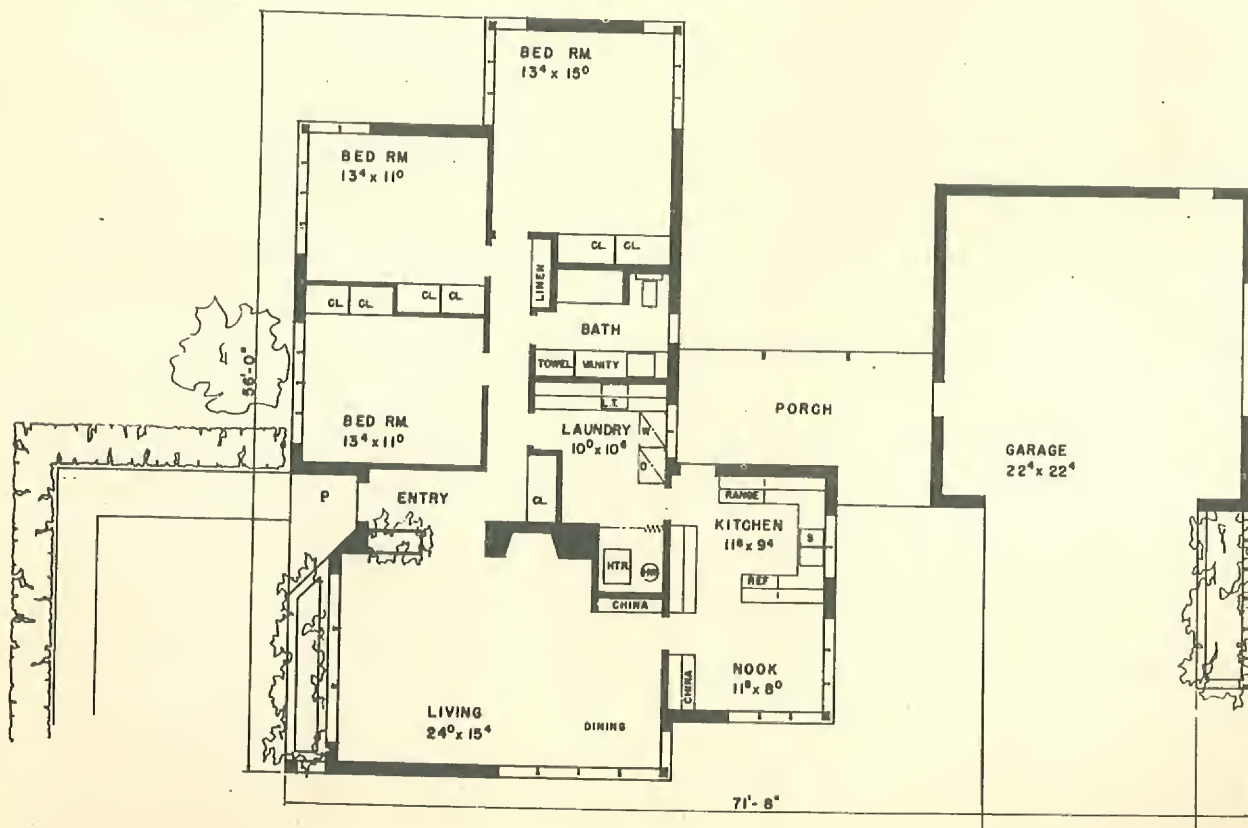

Convenient Living

DESIGN D 92

1,657 Sq. Ft.
19,000 Cu. Ft.
Excluding Garage

A pleasing balance of exterior design has been maintained throughout by the use of stone and brick. Whether you build on a corner lot or not, this home is packed full of fine features for real family living. The sleeping, living and service areas are well defined, and the traffic circulation is excellent. The spacious nook has plenty of windows for cheerfulness. The covered porch near the kitchen for outdoor living and dining also makes the garage seem like a part of the house.

That Save You

TIME and MONEY

BLUEPRINTS: There is a blueprint for every home shown in our books. These ready-to-build professional plans were prepared by the firm of Palmquist & Wright, members of the American Institute of Architects. All necessary dimensions, views, details and elevations are included.

In addition to using them for building, blueprints become indispensable as a further aid to your home planning study and for determining building costs.

1 Set \$7.50; 2 Sets \$12.50; 3 Sets \$15.00;
For every Set over 3, add \$5.00.

MATERIAL LISTS: Material lists also are available for any of our designs. Each list shows you the quantity, type and size of the materials required to build your home. They also tell you where these materials are used. This makes them easy to understand. Material lists simplify your material ordering and enable you to get quicker price quotations from your builder and material dealer. Be sure to request material lists with your blueprints

Material Lists are only \$1.00 each

SPECIFICATION OUTLINES: With each blueprint order, you receive a twelve page specification outline at no additional cost. This fill-in type specification lists 150 phases of home construction—from excavating to painting. Use it for specifying to your builder the exact equipment and methods of construction you want in your next home.

We urge you to order blueprints and material lists directly from the dealer whose name appears on the cover of this book because of the expert guidance and counsel he can supply. If, for some reason, this is not practicable, you may make your remittance in check or money order directly to Home Planners, Inc., 16310 Grand River, Detroit 27, Mich.
